

REGULAR BOARD MEETING

Wednesday, June 1, 2016, 2:00 pm

AGENDA

1. **Call to Order**
2. **Pledge of Allegiance**
3. **Roll Call**
4. **Approval of Minutes**
 - *April 6, 2016 Regular Board Meeting*
5. **Comments from the Public**
6. **Comments from Advisory Committee Members (TAC/CAC/BPAC)**
7. **Approval of Agenda**
8. **Consent Agenda**
 - 8a. **Transportation Disadvantaged (TD) Planning Grant Application:**
Adoption of Resolution 16-03 authorizing the execution of a TD Planning Grant Application for FY 2016/17.

Action: Adopt or do not adopt.
9. **Action Items**
 - 9a. **FY 2016/17 – FY 2020/21 Transportation Improvement Program (TIP):** Review and adoption of the draft FY 2016/17 – FY 2020/21 TIP for the St. Lucie TPO.

Action: Adopt the draft TIP, adopt with conditions, or do not adopt.
 - 9b. **Transportation Alternatives Program (TAP) 2016 Grant Application:** Review and endorsement of a TAP grant application for the 2016 grant cycle.

Action: Endorse the TAP grant application for the 2016 grant cycle, endorse with conditions, or do not endorse.

10. Discussion Items

10a. Walton Road Multimodal Improvements Feasibility Study: The presentation of a preliminary report on the Walton Road Multimodal Improvements Feasibility Study.

Action: None. Discuss and provide comments.

10b. Strategic Intermodal System (SIS) Multimodal Needs Plan Update: A presentation by the Florida Department of Transportation District 4 on the update to the SIS Multimodal Needs Plan.

Action: None. Discuss and provide comments.

11. FDOT Comments**12. Recommendations/Comments by Members****13. TPO Staff Comments**

14. Next Meeting: The next St. Lucie TPO Board Meeting is a regular meeting scheduled for 2:00 pm on Wednesday, August 3, 2016.

15. Adjourn**NOTICES**

The St. Lucie TPO satisfies the requirements of various nondiscrimination laws and regulations including Title VI of the Civil Rights Act of 1964. Public participation is welcome without regard to race, color, national origin, age, sex, religion, disability, income, or family status. Persons wishing to express their concerns about nondiscrimination should contact Marceia Lathou, the Title VI/ADA Coordinator of the St. Lucie TPO, at 772-462-1593 or via email at lathoum@stlucieco.org.

Persons who require special accommodations under the Americans with Disabilities Act (ADA) or persons who require translation services (free of charge) should contact Marceia Lathou at 772-462-1593 at least five days prior to the meeting. Persons who are hearing or speech impaired may use the Florida Relay System by dialing 711.

Items not included on the agenda may also be heard in consideration of the best interests of the public's health, safety, welfare, and as necessary to protect every person's right of access. If any person decides to appeal any decision made by the St. Lucie TPO with respect to any matter considered at this meeting, that person shall need a record of the proceedings, and for such a purpose, that person may need to ensure that a verbatim record of the proceedings is made which includes the testimony and evidence upon which the appeal is to be based.

Kreyòl Ayisyen: Si ou ta renmen resevwa enfòmasyon sa a nan lang Kreyòl Ayisyen, tanpri rele nimewo 772-462-1593.

REGULAR BOARD MEETING

DATE: Wednesday April 6, 2016

TIME: 2:00 pm

LOCATION: St. Lucie TPO
Coco Vista Centre
466 SW Port St. Lucie Boulevard, Suite 111
Port St. Lucie, Florida

MINUTES

1. **Call to Order**

Chairwoman Hensley called the April 6, 2016, regular meeting of the St. Lucie Transportation Planning Organization (TPO) Board to order at 2:09 pm.

2. **Pledge of Allegiance**

Chairwoman Hensley led the Pledge of Allegiance.

3. **Roll Call**

The Roll was called. A quorum was confirmed with seven members present.

Commissioner Mowery arrived after the Roll Call.

Members present:

Kathryn Hensley, Chairwoman
Mayor Linda Hudson, Vice Chairwoman
Commissioner Reginald Sessions
Vice Mayor Linda Bartz
Darrell Drummond

Representing:

St. Lucie Co. School Board
City of Fort Pierce
City of Fort Pierce
City of Port St. Lucie
Community Transit

Commissioner Frannie Hutchinson
Commissioner Paula Lewis
Commissioner Tod Mowery

St. Lucie County
St. Lucie County
St. Lucie County

Others present:

Peter Buchwald
Ed DeFini
Marceia Lathou
Melissa Carter
Crystal Wilson
Jack Andrews
Leslie Olson
Roxanne Chesser
Yanique Kelly
Alice Bojanowski
Veronica Francis

Representing:

St. Lucie TPO
St. Lucie TPO
St. Lucie TPO

Placevision, Inc.
City of Fort Pierce Engineering
St. Lucie County
City of Port St. Lucie
FDOT District 4
Martin MPO
Member of the Public

4. Approval of Minutes - February 3, 2016 –Regular Meeting

* **MOTION – MOVED** by Mr. Drummond to approve the Minutes of the February 3, 2016 Regular Board meeting.

** **SECONDED** by Commissioner Lewis Carried **UNANIMOUSLY**

5. Comments from the Public – None

6. Comments from Advisory Committee Members (TAC/CAC/BPAC)
- None

7. Approval of Agenda

* **MOTION – MOVED** by Mr. Drummond to approve the agenda.

** **SECONDED** by Vice Chairwoman Hudson Carried **UNANIMOUSLY**

8. Consent Agenda

8a. Federal Transit Administration (FTA) Metropolitan Planning Grant Application: Adoption of Resolution 16-01 authorizing the

execution of a FTA Metropolitan Planning Grant Section 5305(d) Application for FY 2016/17.

8b. Metropolitan Planning Organization (MPO) Agreement: Adoption of Resolution 16-02 authorizing the execution of a MPO Agreement and an amendment to the current Joint Participation Agreement for the receipt of Federal Highway Administration Transportation Planning (PL) funds.

* **MOTION – MOVED** by Vice Chairwoman Hudson to approve the Consent Agenda.

** **SECONDED** by Commissioner Hutchison Carried **UNANIMOUSLY**

9. Action Items

9a. Amendment to the FY 2015/16 – FY 2019/20 Transportation Improvement Program (TIP): Review and adoption of an amendment to the FY 2015/16 – FY 2019/20 TIP to add a utility phase to the McCarty Road Bridge Project.

Mr. Buchwald explained that the adopted TIP includes the replacement of the McCarty Road Bridge over Ten Mile Creek. Subsequent to the adoption of the TIP, it was determined by FDOT that a utilities phase needs to be added to the project because of the presence of utilities. FDOT is requesting that the TIP be amended to add this phase to the McCarty Road Bridge Project. Mr. Buchwald noted that the TIP amendment is consistent with the LRTP and does not impact the fiscal constraint of the TIP.

* **MOTION – MOVED** by Vice Mayor Bartz to adopt the amendment to the FY 2015/16 – FY 2019/20 TIP to add a utility phase to the McCarty Road Bridge Project.

** **SECONDED** by Vice Chairwoman Hudson Carried **UNANIMOUSLY**

9b. Draft FY 2016/17 – FY 2017/18 Unified Planning Work Program (UPWP) and Budget: Review and adoption of the draft FY 2016/17 – FY 2017/18 UPWP and budget.

Mr. Buchwald explained the purpose of the UPWP. The current UPWP ends in June, therefore, it is necessary to adopt a new, two-year UPWP. He reviewed the proposed UPWP planning priorities which basically continue the priorities of the current UPWP.

DRAFT

A Call for UPWP Projects was initiated at the November advisory committee meetings and was extended to the public through social media and extensive community outreach. The draft UPWP includes several projects which resulted from this Call for UPWP Projects. Mr. Buchwald highlighted the wide range of projects, activities, and programs the TPO will conduct over the next, two fiscal years.

* **MOTION – MOVED** by Vice Mayor Bartz to adopt the draft FY 2016/17 – FY 2017/18 UPWP and budget.

** **SECONDED** by Commissioner Lewis Carried **UNANIMOUSLY**

9c. Title VI Program Update: Review and adoption of a draft update to the TPO's Title VI Program.

Ms. Lathou provided background information on the Title VI and environmental justice (EJ) requirements. The proposed update to the TPO's Title VI Program is necessary to align with current laws, regulations, and data.

Ms. Lathou described the components of the Title VI Program update which include a public involvement process, Limited English Proficiency (LEP) Plan, complaint process, and public notice requirements. She described the EJ analysis that was conducted as part of the Go2040 LRTP.

The process for adoption of the Title VI program was described. It was noted that the update was reviewed by FHWA Office of Civil Rights staff, and no changes were recommended based on that review.

Commissioner Mowery asked, with the dozens of languages spoken in the TPO area, how the level of language assistance is determined. Ms. Lathou explained the concept of the safe harbor threshold. She mentioned the TPO, through contracting with a professional language firm, can provide assistance in more than 100 languages.

* **MOTION – MOVED** by Vice Mayor Bartz to adopt the draft update to the TPO's Title VI Program.

** **SECONDED** by Commissioner Mowery Carried **UNANIMOUSLY**

9d. Transportation Regional Incentive Program (TRIP) Grant Application for 2016: Review and endorsement of the TRIP grant application for the 2016 grant cycle.

DRAFT

Mr. Buchwald described the purpose of the TRIP Program. He said a single TRIP application was submitted for the 2016 TRIP grant cycle by the City of Port St. Lucie. The application is for a project on Port St. Lucie Boulevard from Darwin Boulevard to Gatlin Boulevard. The roadway will be improved to an urban, complete street section with closed drainage to be consistent with the other existing and programmed sections of the Port St. Lucie Boulevard corridor. The project addresses a significant multimodal gap in a corridor of the regional multimodal system.

Commissioner Mowery requested details about the number of lanes for the roadway improvement and expressed concern that the project might be inadequate to handle future congestion. Mr. Buchwald noted the project's consistency with existing and programmed future sections of Port St. Lucie Boulevard.

* **MOTION – MOVED** by Commissioner Hutchison to endorse the TRIP grant application for the 2016 grant cycle.

** **SECONDED** by Vice Chairwoman Hudson Carried **UNANIMOUSLY**

10. FDOT Comments-None

11. Recommendations/Comments by Members - Commissioner Hutchinson noted that in the past, emergency funds have been used for the improvement of Indian River Drive. She recommended that TPO staff explore options for non-emergency road improvements for this corridor. Several Board members agreed and Chairwoman Hensley directed Mr. Buchwald to undertake this effort.

Ms. Hensley described recent state legislation that requires mental health entities to develop transportation plans. She noted this would be of particular interest to the Local Coordinating Board for the Transportation Disadvantaged.

12. TPO Staff Comments – Mr. Buchwald announced that the TPO was one of only two MPOs in the State chosen to host an upcoming FHWA workshop. The subject of the workshop, which takes place on Friday, April 22, is travel time reliability.

13. Next Meeting: The next St. Lucie TPO Board meeting is a regular meeting scheduled for 2:00 pm on Wednesday, June 1, 2016.

DRAFT

14. Adjourn – The meeting was adjourned at 2:44 pm.

Respectfully submitted:

AGENDA ITEM SUMMARY

Board/Committee: St. Lucie TPO Board

Meeting Date: June 1, 2016

Item Number: 8a

Item Title: Transportation Disadvantaged (TD) Planning Grant Application

Item Origination: Unified Planning Work Program (UPWP)

UPWP Reference: Task 3.8 – Transportation Disadvantaged program

Requested Action: Adopt or do not adopt.

Staff Recommendation: Because the TD Grant facilitates the conduct of the TD program in the TPO area, it is recommended that the Board adopt Resolution No. 16-03 to authorize the TPO Executive Director to apply for a FY 2016/17 TD Planning Grant and execute an agreement for the Grant.

MEMORANDUM

TO: St. Lucie TPO Board

THROUGH: Peter Buchwald
Executive Director

FROM: Marceia Lathou
Transit Program Manager

DATE: May 20, 2016

SUBJECT: **Transportation Disadvantaged (TD) Planning Grant Application**

BACKGROUND

The Florida Legislature created Florida's Transportation Disadvantaged (TD) Program in 1979 to foster the coordination of transportation services for the state's TD population. The TD population consists of individuals whose physical or mental disability, income status, or age make them unable to transport themselves or to purchase transportation. The TD Program is administered at the state level by the Florida Commission for the Transportation Disadvantaged (FCTD).

In St. Lucie County, the TD Program is administered at the local level by the St. Lucie County Community Services Department under the oversight of the Local Coordinating Board for the Transportation Disadvantaged (LCB). The St. Lucie TPO provides planning-related staff support and resources to the Community Services Department and the LCB to assist in the identification of and response to the public transportation needs in the St. Lucie service area.

The TD Program and the support and resources provided by the TPO for the TD Program are further described in the attached excerpt from the TPO's FY 2016/17 – FY 2017/18 Unified Planning Work Program (UPWP).

ANALYSIS

Attached is St. Lucie TPO Resolution No. 16-03 which authorizes the application for and the execution by the TPO Executive Director of a TD planning grant agreement for FY 2016/17. The grant is in the amount of \$24,862 and is 100-percent state funded. The grant funds are used to perform planning-related work tasks for the TD program, as per Florida Statutes and as described in the UPWP excerpt.

RECOMMENDATION

Because the TD Grant facilitates the conduct of the TD program in the TPO area, it is recommended that the Board adopt Resolution No. 16-03 to authorize the TPO Executive Director to apply for a FY 2016/17 TD Planning Grant and execute an agreement for the Grant.

Task 3.8 Transportation Disadvantaged (TD) Program		
Purpose:		
To provide coordination and planning services for the St. Lucie County TD Program in accordance with Chapter 427 FS, Rule 41-2 FAC, and the Americans with Disabilities Act (ADA) which includes the identification of unmet TD needs.		
Previous Work:		
<p>TPO staff annually evaluated and assisted the Community Transportation Coordinator (CTC) in its role of providing safe, coordinated TD services to the elderly, disabled, veterans, and the economically disadvantaged citizens in St. Lucie County. TPO staff assisted the CTC in the development of the minor updates to the TDSP/Coordinated Plan.</p> <p>TPO staff also provided administrative services to the LCB. This included preparation of minutes, agendas, grant applications, progress reports, and other products. Staff also assessed legislatively mandated changes to the state TD program and undertook TD-related activities as necessary to comply with state legislation. Additional activities included assessing the areas where demand-response services are needed but are not within the local provider service area. Staff assisted in finding alternatives to accommodate those needs.</p> <p>The TD program is coordinated with other public transit planning and services, including veteran services, through the LCB and associated work products. TPO staff coordinated with FDOT and provided technical assistance for the transitioning of non-life sustaining riders from current demand response program services to fixed or deviated route services.</p> <p>The TD Program continued to incorporate Environmental Justice into its mission by identifying and addressing, as appropriate, the effects of programs, policies, and activities on minority and low-income populations. The TPO continued to strive to involve the potentially affected public and to develop partnerships with and enhance the participation by the traditionally underserved.</p>

RESOLUTION NO. 16-03

A RESOLUTION OF THE BOARD OF THE ST. LUCIE TRANSPORTATION PLANNING ORGANIZATION, HEREINAFTER "BOARD", AUTHORIZING THE APPLICATION FOR TRANSPORTATION DISADVANTAGED (TD) FUNDS AND EXECUTION OF A TD GRANT AGREEMENT WITH THE FLORIDA COMMISSION FOR THE TRANSPORTATION DISADVANTAGED FOR FISCAL YEAR 2016/17.

WHEREAS, the BOARD is eligible to apply for and receive Transportation Disadvantaged funds and to undertake a transportation disadvantaged service program as authorized by Section 427.0159, Florida Statutes, and Rule 41-2, Florida Administrative Code.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD THAT:

1. The BOARD has the authority to apply for TD funds and to execute a TD grant agreement.
2. The BOARD authorizes the TPO Executive Director to apply for TD funds and execute a TD grant agreement on behalf of the BOARD with the Florida Commission for the Transportation Disadvantaged.
3. The BOARD's Registered Agent in Florida is the TPO Executive Director. The Registered Agent's address is 466 SW Port St. Lucie Boulevard, Suite 111, Port St. Lucie, Florida, 34953.
4. The BOARD authorizes the TPO Executive Director to sign any and all agreements or contracts which are required in connection with the grant agreement.
5. The BOARD authorizes the TPO Executive Director to sign any and all assurances, reimbursement invoices, warranties, certifications and any other documents which may be required in connection with the application, agreement or subsequent agreements.

PASSED AND DULY ADOPTED this 1st day of June, 2016.

MEMORANDUM

TO: St. Lucie TPO Board

THROUGH: Peter Buchwald
Executive Director

FROM: Yi Ding
Program Manager

DATE: May 24, 2016

SUBJECT: FY 2016/17 – FY 2020/21 Transportation Improvement Program (TIP)

BACKGROUND

According to Federal and State requirements, the St. Lucie Transportation Planning Organization (TPO) annually must develop a Transportation Improvement Program (TIP). The purpose of the TIP is to identify the transportation improvement projects located within the TPO area that have been prioritized and are receiving Federal and State funding over a five-year period.

In addition, the TIP is used to coordinate projects among the U.S. Department of Transportation (USDOT), the Florida Department of Transportation (FDOT), and the local governments located within the TPO area. The TIP is developed and adopted annually by the TPO in cooperation with the USDOT, FDOT, TPO advisory committees, local governments, port and aviation authorities, transit operators, and the general public.

ANALYSIS

The development of the TIP is a year-long process that is continuous, cooperative, and comprehensive. For the TPO's FY 2016/17 – FY 2020/21 TIP, the process started in June 2015 with a meeting with staffs from the St. Lucie TPO, FDOT District 4, and the local governments to informally discuss the TPO's priority projects. The List of Priority Projects (LOPP) then was

developed, reviewed by the TPO advisory committees, adopted by the TPO Board, and submitted to FDOT District 4 in August 2015.

The LOPP was utilized by FDOT District 4 to develop their Draft Tentative Work Program for FY 2016/17 – FY 2020/21. The Draft Tentative Work Program was reviewed and recommended for endorsement by the TPO advisory committees in September 2015 and was endorsed by the TPO Board in October 2015.

In the Draft Tentative Work Program, the new phases that were programmed include a reserve for the construction of Port St. Lucie Boulevard from Paar Drive to Darwin Boulevard, a reserve for right-of-way (ROW) acquisition for Midway Road from Glades Cut Off to Selvitz Road, the construction of the intersection improvement at U.S. Highway 1 and Virginia, the construction of the St. Lucie Advanced Transportation Management System, the design of Port St. Lucie Boulevard from Becker Road to Paar Drive, and the design of Kings Highway from the I-95 Overpass to St. Lucie Boulevard. In addition, other highlights of the DTWP include the programming of the construction of the Parr Drive Sidewalk from Port St. Lucie Boulevard to Darwin Boulevard, the acquisition of ROW for the I-95 Jobs Express Terminal and Park and Ride Lot on Gatlin Boulevard, and the installation of adaptive signal control technology on U.S. Highway 1 between Virginia Avenue and Avenue H.

The Final Tentative Work Program was received from FDOT in April 2016 and was used to prepare the attached TIP through the web-based Interactive TIP. The Final Tentative Work Program is a primary component of the TIP.

The Final Tentative Work Program was reviewed by TPO staff for consistency with the Draft Tentative Work Program. The Final Tentative Work Program appears to be consistent with the Draft Tentative Work Program.

At their meetings during the week of May 16th, the TPO advisory committees recommended adoption of the FY 2016/17 – FY 2020/21 TIP subject to the incorporation of revisions to clarify additional descriptive information. These revisions have been incorporated into the draft TIP.

RECOMMENDATION

As the Final Tentative Work Program appears to be consistent with the Draft Tentative Work Program that was endorsed by the TPO Board and based on the recommendations of the TPO advisory committees, it is recommended that the draft FY 2016/17 – FY 2020/21 TIP be adopted.

DRAFT
TRANSPORTATION IMPROVEMENT PROGRAM
FY 2016/17 - FY 2020/21

A. INTRODUCTION

A.1 How to Use the TIP

The intent of the Transportation Improvement Program (TIP) is to identify and prioritize the transportation improvement projects over the next five years that are receiving State and Federal funding and are located within the Metropolitan Planning Area (MPA) of the St. Lucie Transportation Planning Organization (St. Lucie TPO). The St. Lucie TPO MPA is identified on the map on page A-7.

To use the TIP:

- Locate the project in the Project Index in Section A.2 or on either of the Project Location Maps in Section A.3 to identify the Project Number or Project Name.
- Using the Project Name, reference directly the alphabetically-listed projects in the Detailed Project Listing pages or, by using the Project Number, identify the TIP Page Number for the project from the Project Index.
- Refer to the corresponding TIP Page Number to obtain information regarding the project in the Detailed Project Listings pages.
- Refer to the corresponding LRTP Page Number in the Project Index or in the Detailed Project Listings pages to cross-reference the project, if applicable, in the Go2040 Long Range Transportation Plan (LRTP).
- Refer to Section A.4 for a Glossary of Abbreviations and Phase/Funding Codes.
- Refer to Section B for information on Federal and State requirements for development of the TIP.
- Refer to Section C for the Detailed Project Listings which include whether the project is located on the Florida Strategic Intermodal System (SIS) and the Total Project Cost.
- Refer to Section D for the TPO List of Priority Projects.
- Refer to Section E for an evaluation of project and system performance
- Refer to the Appendices for an Example Public Comment Notice and for information on locally-funded projects and TIP amendments that have been adopted.
- Refer to the contact information on the cover of the TIP if you have any questions or comments.

Explanations of the SIS and Total Project Costs

SIS: The SIS is a network of high priority transportation facilities in Florida which includes the State's largest and most significant commercial service airports, spaceport, deep-water seaports, freight and passenger rail terminals, intercity bus terminals, rail corridors, waterways and highways. All projects on the SIS will have a SIS identifier in the top right corner of the Detailed Project Listings pages in Section C of the TIP.

Total Project Costs: A typical project production sequence is to have a Project Development and Environment (PD&E) phase, followed by a Design (PE) phase, a Right of Way (ROW) phase and a Construction (CST) phase. Some projects may not include a ROW phase if land acquisition is not needed to complete the project. Costs in the Detailed Project Listing pages in Section C of the TIP may include the historical costs (Prior Year Cost), the costs in the five years of the current TIP, the costs in the years beyond the current TIP (Future Year Cost), and the sum of all of these costs which is the Total Project Cost. For some projects such as resurfacing, safety, or operational projects, there may not be a Total Project Cost identified, but additional details on that program will be included.

A.5 TPO Metropolitan Planning Area Map

B. NARRATIVE

B.1 Purpose

The purpose of the TIP is to identify and prioritize transportation improvement projects receiving Federal and State funding over a five-year period that are located within the St. Lucie TPO MPA. In addition, the TIP is used to coordinate the transportation improvement projects of the U.S. Department of Transportation (USDOT), the Florida Department of Transportation (FDOT), and the local governments located within the MPA. Projects in the TIP are presented in Year of Expenditure (YOE), which takes into account the inflation rate over the five years in the TIP. Therefore the programmed cost estimate for each project is inflated to the year that the funds are expended based on reasonable inflation factors developed by the State and its partners. The TIP is also used to identify all regionally significant transportation projects for which Federal action is required, whether or not the projects receive Federal funding. As the St. Lucie TPO is in an air quality attainment area, there are no regionally significant air quality-related transportation improvement projects in the TIP.

B.2 Financial Plan

The Financial Plan of the TIP is based upon the FDOT District 4 Tentative Work Program for FY 2016/17 – FY 2020/21; the previous **year's TIP**; the Go2040 Long Range Transportation Plan (LRTP); and information provided by St. Lucie County, the City of Port St. Lucie, and the City of Fort Pierce. The Financial Plan includes Federal, State, and local transportation funding sources which are identified in the following tables based on the type of transportation improvement:

HIGHWAY/ROADWAY/SIDEWALKS	FUND	TOTAL	2016/17	2017/18	2018/19	2019/20	2020/21

B.3 Project Selection

The selection of federally-funded projects within the St. Lucie TPO MPA for the TIP is consistent with Federal regulations [23 CFR 450.330(c)] and is carried out by the TPO in cooperation with FDOT and the transit operator. The TIP has been developed in coordination with the USDOT, FDOT, St. Lucie TPO Advisory Committees, local governments, port and aviation authorities, transit operators, and the general public as summarized in Section B.6 of the TIP.

For the TPO's FY 2016/17 – FY 2020/21 TIP, the project selection and TIP development process started in June 2015 with a meeting with staffs from the St. Lucie TPO, FDOT District 4, and the local governments to informally discuss the priority projects. The List of Priority Projects (LOPP) then was developed based on the LRTP and other plans as identified in Section B.4, local agency input, and public comments. The LOPP was reviewed by the St. Lucie TPO Advisory Committees and was adopted by the St. Lucie TPO Board and submitted to FDOT District 4 in August 2015. The LOPP was utilized by FDOT District 4 to develop their Draft Tentative Work Program for FY 2016/17 – FY 2020/21. The Draft Tentative Work Program was reviewed and endorsed by the Advisory Committees in September 2015 and by the Board in October 2015. The Final Tentative Work Program was received from FDOT in April of 2016. The Final Tentative Work Program is the primary component of the TIP. The TPO LOPP is reproduced in Section D of the TIP.

B.4 Consistency with Other Plans

The projects in the TIP are based on the LRTP, the St. Lucie Transit Development Plan, the Transportation Disadvantaged Service Plan / Coordinated Public Transit – Human Services Transportation Plan, and other transportation plans of the St. Lucie TPO. These plans are cross-referenced in the LOPP, and the TIP projects are cross-referenced with the LRTP in the Project Index and TIP/LRTP Cross-Reference in Section A.2. The projects also are consistent with the St. Lucie County Airport Master Plan, the Port of Fort Pierce Master Plan, and the 2060 Florida Transportation Plan.

In addition, the TIP has been developed to be consistent with adopted local Comprehensive Plans including the St. Lucie County, City of Fort Pierce, City of Port St. Lucie, and St. Lucie Village Comprehensive Plans. The transportation network in the TPO MPA contains the traffic circulation elements included in the adopted St. Lucie County, City of Fort Pierce, City of Port St. Lucie, and St. Lucie Village Comprehensive Plans. Projections of future traffic volumes and levels of service were developed based on the Future Land Use Elements of the respective plans. The projections, as identified in the LRTP, served as a basis for determining the need for new or expanded transportation facilities and transportation management systems to support proposed development and to maintain or improve adopted level of service standards.

B.5 Project Priority Statement

The projects selected in the TIP are based upon the TPO LOPP and the corresponding prioritization methodology and the goals, objectives and performance measures identified in Table 2-5 of the LRTP. The project prioritization was based on qualitative and quantitative analyses of the transportation projects in the TPO MPA which included the scoring and ranking of multimodal project priorities as identified in Table 3-5 of the LRTP. The project priorities were further refined with the development of transportation alternatives and scenarios planning as summarized in Chapter 5 of the LRTP and the consideration of public comment as summarized in Chapter 6 of the LRTP.

B.6 Public Involvement

Public involvement in the development of the LOPP and the TIP is continuous, cooperative, and comprehensive and was conducted in accordance with the adopted Public Involvement Program (PIP) of the St. Lucie TPO and with Federal regulations [23 CFR 450.316 and 23 CFR 450.324(b)]. Reasonable opportunity to comment on the LOPP and the TIP was provided to all interested parties including, but not limited to, citizens, affected public agencies, public transit providers, freight shippers, private transportation providers, bicycle/pedestrian representatives, and the disabled. The process included those traditionally underserved and underrepresented consistent with the principles of Title VI. The process is followed for all projects funded in whole or part by the Federal Transit Administration (FTA) or the Federal Highway Administration (FHWA) pursuant to the Federal requirements.

Adequate and timely notice of public comment opportunities, the use of visualization techniques and electronic formats for the presentation of information, and convenient public meetings were incorporated into the public involvement process for the LOPP, Tentative Work Program, and the TIP. The notices and opportunities for public comment that were provided included the following:

- Display advertising of public meetings and comment opportunities in a daily local newspaper of general circulation.
- Posting of public meetings and comment opportunities on the TPO website.
- Providing notices of public meetings and comment opportunities to interested parties including citizens, affected public agencies, public transit providers, freight shippers, private transportation providers, bicycle/pedestrian representatives, and the disabled.
- Providing draft materials for review in person or by mail, fax or email.
- Conducting public meetings of the Advisory Committees and Board for the LOPP, Tentative Work Program and the TIP.
- Incorporating general public comment opportunities at the start of all public meetings.
- Providing comment cards at all public meetings.

All the comments that were received were considered in the preparation of the LOPP and TIP. An Example Public Comment Notice is reproduced in Appendix A.

B.7 TIP Amendments

TIP Amendments are completed in accordance with applicable requirements [23 CFR 324 and 326] when a project is added or deleted, when the fiscal constraint of the TIP is impacted by a project, and/or when there are significant changes in the scope of a project. The amendment of the TIP includes the preparation of a TIP Amendment Form that summarizes the nature of the changes.

Prior to the adoption of a TIP amendment by the TPO Board, notice and public comment opportunities are provided regarding the amendment consistent with Section B.6. Upon adoption of the amendment by the TPO Board, the TIP Amendment Form is incorporated into Appendix E of the TIP.

B.8 Annual Listing of Obligated Federal Funding/Implemented Projects FY 2015/16

The annual listing of implemented projects for which federal funds have been obligated in the preceding year has been made available for public review and is summarized in the following table:

FDOT NUMBER	DESCRIPTION PROJECT LIMITS	PROJECT WORK MIX	MILES LENGTH	2015 FUND TOTAL	FUND CODE	PRELIMINARY ENGINEERING	RIGHT-OF-WAY	CONSTRUCTION	GRANTS MISC.

B.9 Certifications

To ensure Federal requirements are being met, the FHWA and FTA conduct Federal certification reviews on a quadrennial basis of the urbanized areas of TPOs/MPOs which also are designated by census as Transportation Management Areas (TMAs) because the population exceeds 200,000 people. The urbanized area of the St. Lucie TPO is designated as the Port St. Lucie TMA. The last Federal review of the TMA was completed in September 2013 and resulted in six Noteworthy Practices being identified for the St. Lucie TPO. No Corrective Actions were identified for the St. Lucie TPO as a result of the review.

The TPO and FDOT also perform joint certification reviews annually to ensure that State and Federal requirements are being met. The last joint certification review was completed in May 2016 which resulted in the joint certification of the St. Lucie TPO. Support documentation concerning the Federal and joint certification reviews is on file at the St. Lucie TPO offices and available for review during normal business hours.

B.10 Congestion Management Process (CMP)

The development and implementation of a CMP is a requirement to be eligible for Federal funding. CMP Box Funds in the amount of \$300,000 - \$400,000 annually have been established by the St. Lucie TPO. Beyond the five fiscal years of the TIP, the LRTP continues to allocate approximately \$3.25 million in funding towards the CMP on a yearly basis through 2040.

The overall purpose of the St. Lucie TPO CMP is to create a better quality of life for St. Lucie residents and visitors through lowering travel delay, reducing harmful emissions, and improving safety. The CMP identifies areas with congestion or safety issues, develops strategies to address the issues, and prioritizes projects based a ranking criteria.

The St. Lucie TPO CMP was adopted in 2011, and a two-tiered approach (Tier I and Tier II) was utilized in the CMP to identify projects. The Tier I analysis provided a system-wide screening for areas of concern. The Tier II analysis included a detailed evaluation of the identified areas of concern. Based on the results of the Tier II evaluation, CMP projects were identified, and a project scoring criteria and the basis for the CMP Implementation Plan were developed.

Incorporating multimodal performance measures, the CMP Implementation Plan utilizes both traditional and non-traditional strategies to address the areas of concern, to reduce vehicle miles traveled, and to consider climate adaptation and proposes improvements which support multimodal elements and safety. The CMP projects from the CMP Implementation Plan that are not funded in the TIP may be added to CMP List of the TPO's LOPP for future funding with the CMP Box Funds.

B.11 Transportation Disadvantaged (TD) Program

TD services are facilitated by the St. Lucie TPO pursuant to Florida Statute 427.015. The projects and costs of the St. Lucie TPO TD Program are summarized in the following:

B.12 Transportation Regional Incentive Program (TRIP)

In 2005, the Florida Legislature enacted the Florida TRIP through Senate Bill 360. The stated purpose of the program is to encourage regional planning by providing state matching funds for improvements to regionally-significant transportation facilities identified and prioritized by regional partners.

According to FDOT, two primary program requirements are as follows:

- 1) Eligible recipients must be a partner, through an Interlocal Agreement, to a regional transportation planning entity; and,
- 2) The partners must represent a regional transportation planning area and develop a plan that identifies and prioritizes regionally significant facilities.

To satisfy the application requirements for TRIP funding, an Interlocal Agreement was executed by the St. Lucie TPO, Martin MPO, and Indian River MPO to create a regional transportation planning entity known as the Treasure Coast Transportation Council (TCTC). The TCTC subsequently adopted a plan to identify and prioritize regionally significant facilities for the selection of projects for TRIP funding. This plan subsequently was updated in 2016.

St. Lucie TPO projects currently programmed include \$417,174 of TRIP funding. The Port St. Lucie Boulevard project (#4317522) is receiving \$45,451 in TRIP funding, and the SR-9/I-95 @ St. Lucie West Boulevard project (#4353371) is receiving \$371,723 in TRIP funding.

E. PERFORMANCE MANAGEMENT

Table E-1 presents the performance measures for the Go2040 LRTP and demonstrates their consistency with proposed State and Federal performance measures.

Table E-1: Goals, Objectives and Performance Measures

Goals		Objectives	Performance Measures	MAP-21 PM	FDOT PM
1	Economic Prosperity and Growth	Enable people and goods to move around efficiently.	Lane miles of additional capacity along existing congested (V/C>0.85) corridors	Yes	Yes
			% truck miles severely congested	Yes	Yes
		Increase transportation options and improve access to destinations that support prosperity and growth.	% population within ¼ mile of Activity Centers		
			Transit routes providing access to Activity Centers		
2	Choices	Improve bike/pedestrian and public transportation networks.	% of roadways with sidewalks and bike lanes	Yes	Yes
			% of transit stops with sidewalk access	Yes	Yes
		Provide for transportation needs of transportation disadvantaged that may include use of automated vehicles.	Miles of fixed route transit service	Yes	Yes
			% of low-income, older adults, persons with disabilities within ¼ mile of transit route	Yes	Yes
3	Existing Assets and Services	Maintain condition of existing transportation assets.	Pavement condition, 70 or less		
			Bridge condition, 50 or less		
			Percent transit fleet beyond useful life		
		Improve efficiency of existing transportation services.	VMT of roads operating at adopted LOS		
4	Cooperation	Facilitate unified transportation decision-making through intergovernmental cooperation.	Attendance at TPO meetings		
			Collaboration opportunities with local and resource agencies		
		Ensure community participation is representative.	Collaboration opportunities with community and public groups		
			Opportunities for engagement in traditionally underserved areas		
5	Health and Environment	Support healthy living strategies, programs, and improvements.	Community Walkscores		
			Number of bicycle riders		
		Make transportation investments that minimize impacts to natural environment and allocate resources toward mitigation.	Number of additional roadway lane miles of impacting environmentally-sensitive areas		
			Increase transit frequency and span of service		
6	Safety and Security	Improve safety of transportation system that may include incorporation of infrastructure in support of automated vehicles.	Number and rate of fatalities/serious injuries, motorized	Yes	Yes
			Number of fatalities/serious injuries, non-motorized	Yes	Yes
		Improve the transportation system's stability/resiliency in the event of climate change, emergencies or disasters	Number of projects permanently inundated by Mean Sea Level (MSL + 5 inches)		

Table E-2 presents initial performance targets. These performance targets are based on current available data. Performance targets may require additional data collection efforts by the TPO, and the performance measures will be updated going forward on an annual basis.

Table E-2: LRTP Performance Targets

Goal	Objectives	Performance Measures	E+C with 2040 SE Data	Adopted Needs Plan	Adopted Cost Feasible Plan
1	Enable people and goods to move around efficiently.	Lane miles of additional capacity along existing congested (V/C>0.85) corridors	Base	53	15
		% truck miles severely congested	16.07	1.575	2.87
	Increase transportation options and improve access to destinations that support prosperity and growth.	% population within ¼ mile of Activity Centers	21%	16%	16%
		Transit routes providing access to Activity Centers	7	17	7
2	Improve bike/pedestrian and public transportation networks.	% of roadways with sidewalks and bike lanes	46%	59%	43%
		% of transit stops with sidewalk access	86%	85%	86%
	Provide for transportation needs of transportation disadvantaged that may include use of automated vehicles.	Miles of fixed route transit service	74	104	74
		% of low-income, older adults, persons with disabilities within ¼ mile of transit route	25%	33%	19%
3	Maintain condition of existing transportation assets.	Pavement condition, 70 or less	n/a	n/a	n/a
		Bridge condition, 50 or less	n/a	n/a	n/a
		Percent transit fleet beyond useful life	n/a	n/a	n/a
	Improve efficiency of existing transportation services.	VMT of roads operating at adopted LOS	440,060	474,940	456,076

Example Public Comment Notice

TRANSPORTATION IMPROVEMENT PROGRAM PUBLIC COMMENT OPPORTUNITIES

Public comment opportunities are provided for the draft FY 2016/17–FY 2020/21 Transportation Improvement Program (TIP) of the St. Lucie Transportation Planning Organization (TPO). The TIP identifies the phases of the transportation projects that are expected to occur within the TPO area over the next 5 years.

To Obtain the TIP for Review

- 1) Appear in person or write to the St. Lucie TPO at 466 SW Port St. Lucie Boulevard, Suite 111, Port St. Lucie, Florida, 34953
- 2) Call 772-462-1593
- 3) Access the TPO website at www.stlucietpo.org

To Provide Comments on the TIP

- 1) Write to the St. Lucie TPO at 466 SW Port St. Lucie Blvd, Suite 111, Port St. Lucie, Florida, 34953
- 2) Call 772-462-1593
- 3) Email TPOAdmin@stlucieco.org
- 4) Appear in person at the following upcoming, public St. Lucie TPO Board Meeting:
June 1, 2016, 2:00pm
Coco Vista Centre
466 SW Port St. Lucie Boulevard, Suite 111
Port St. Lucie, Florida

For Special Assistance

Disabled: Persons who require special accommodations under the Americans with Disabilities Act (ADA) or persons who require translation services (free of charge) should contact Marceia Lathou at 772-462-1593 at least five days prior to the meeting. Persons who are hearing or speech impaired may use the Florida Relay System by dialing 711.

Kreyol Aysiyen: Si ou ta renmen resevwa enfòmasyon sa a nan lang Kreyòl Aysiyen, tanpri rele nimewo 772-462-1593.

Español: Si usted desea recibir esta información en español, por favor llame al 772-462-1593.

Title VI Statement: The St. Lucie TPO satisfies the requirements of various nondiscrimination laws and regulations including Title VI of the Civil Rights Act of 1964. Public participation is welcome without regard to race, color, national origin, age, sex, religion, disability, income, or family status. Persons wishing to express their concerns about nondiscrimination should contact Marceia Lathou, the Title VI/ADA Coordinator of the St. Lucie TPO, at 772-462-1593 or via email at lathoum@stlucieco.org.

AGENDA ITEM SUMMARY

Board/Committee:	St. Lucie TPO Board
Meeting Date:	June 1, 2016
Item Number:	9b
Item Title:	Transportation Alternatives Program (TAP) 2016 Grant Application
Item Origination:	Fixing America's Surface Transportation (FAST) Act
UPWP Reference:	Task 3.3: Transportation Improvement Program Task 3.5: Bicycle/Pedestrian/Greenway Planning
Requested Action:	Endorse the TAP grant application for the 2016 grant cycle, endorse with conditions, or do not endorse.
Staff Recommendation:	Based on the inclusion of the project in the 2015/16 TA Priority Project List and on the recommendations of the TPO advisory committees, it is recommended that the North Macedo Boulevard Sidewalk Project be endorsed for the allocation of the TAP funding from the 2016 grant cycle.

MEMORANDUM

TO: St. Lucie TPO Board

FROM: Peter Buchwald
Executive Director

DATE: May 24, 2016

SUBJECT: **Transportation Alternatives Program (TAP)
2016 Grant Application**

BACKGROUND

The TAP was reauthorized by the Moving Ahead for Progress in the 21st Century Act (MAP-21) and was continued as a "set-aside" in the Fixing America's Surface Transportation (FAST) Act that was enacted last year. The program provides funding for the following:

- Construction, planning, and design of on-road and off-road facilities for pedestrians, bicyclists, and other non-motorized modes.
- Construction, planning, and design of infrastructure-related projects and systems that will provide safe routes for non-drivers, including children, older adults, and individuals with disabilities, to access daily needs.
- Conversion and use of abandoned railroad corridors for trails for pedestrians, bicyclists, or other non-motorized modes.
- Construction of turnouts, overlooks, and viewing areas.
- Community improvement activities, including:
 - inventory, control, or removal of outdoor advertising;
 - preservation and rehabilitation of historic transportation facilities;
 - vegetation management practices in transportation rights-of-way to improve safety, prevent against invasive species, and provide erosion control; and
 - archaeological activities relating to impacts from the implementation of a transportation project.

- Environmental mitigation activities, including pollution prevention and abatement activities, to:
 - address stormwater management and pollution prevention and abatement activities related to highway construction or runoff; or
 - reduce vehicle-caused wildlife mortality or to restore and maintain connectivity among terrestrial or aquatic habitats.

- The Recreational Trails Program.

- The Safe Routes to School Program.

- Planning, designing, or constructing boulevards and other roadways largely in the right-of-way of former Interstate System routes or other divided highways.

The funding available for the 2016 TAP grant cycle for the St. Lucie TPO is \$646,747 that will be programmed by the Florida Department of Transportation (FDOT) in Fiscal Year 2019/20. The TPO Board prioritizes/endorsees the TAP grant applications for submittal to FDOT after the TPO advisory committees provide prioritization/endorsement recommendations to assist the TPO Board. Candidate TAP Projects originate from the 2015/16 TA Priority Project List which is attached.

ANALYSIS

A TAP grant application (attached) was received for the 2016 TAP grant cycle from the City of Port St. Lucie for the construction of a 5-foot wide concrete sidewalk, approximately one mile in length, on the south side of North Macedo Boulevard between St. James Drive and Selvitz Road. The project is estimated to cost \$872,243, and a total of \$719,776 of TAP grant funding is being requested. The North Macedo Boulevard Sidewalk Project is the 7th-ranked TA project on the 2015/16 TA Priority Project List.

At their meetings during the week of May 16th, the TPO advisory committees recommended endorsement of the North Macedo Boulevard Sidewalk Project.

RECOMMENDATION

Based on the inclusion of the project in the 2015/16 TA Priority Project List and on the recommendations of the TPO advisory committees, it is recommended that the North Macedo Boulevard Sidewalk Project be endorsed for the allocation of the TAP funding from the 2016 grant cycle.

has been LAP certified in the last 5 years

1 Qualifying Activities:

Check the transportation alternatives activity that the proposed project will address. Please check **one** activity that represents the majority of the work proposed. (Note: Checking more activities does not ensure or increase eligibility.) Eligible activities must be consistent with details described under 23 U.S.C. 213(b).

- Construction of on-road and off-road trail facilities for pedestrians, bicyclists, and other non-motorized forms of transportation, including sidewalks, bicycle infrastructure, pedestrian and bicycle signals, traffic calming techniques, lighting and other safety-related infrastructure, and transportation projects to achieve compliance with the Americans with Disabilities Act of 1990
- Construction of infrastructure-related projects and systems that will provide safe routes for non-drivers, including children, older adults, and individuals with disabilities to access daily needs.
- Conversion and use of abandoned railroad corridors for trails for pedestrians, bicyclists, or other non-motorized transportation users
- Construction of turnouts, overlooks, and viewing areas
- Inventory, control, or removal of outdoor advertising
- Historic preservation and rehabilitation of historic transportation facilities
- Vegetation management practices in transportation rights-of-way to improve roadway safety, prevent against invasive species, and provide erosion control

- Archaeological activities relating to impacts from implementation of a transportation project eligible under title 23
- Any environmental mitigation activity, including pollution prevention and pollution abatement activities and mitigation to:
 - address stormwater management, control, and water pollution prevention or abatement related to highway construction or due to highway runoff, including activities described in sections 133(b)(11), 328(a), and 329 of title 23; or
 - reduce vehicle-caused wildlife mortality or to restore and maintain connectivity among terrestrial or aquatic habitats.
- The safe routes to school program under section 1404 of the SAFETEA-LU **note, Florida's Safe Routs to School Infrastructure application must accompany this application to be considered for funding.**
 - infrastructure-related projects on any public road or any bicycle or pedestrian pathway or trail in the vicinity of schools that will substantially improve the ability of students to walk and bicycle to school, including sidewalk improvements, traffic calming and speed reduction improvements, pedestrian and bicycle crossing improvements, on-street bicycle facilities, off-street bicycle and pedestrian facilities, secure bicycle parking facilities, and traffic diversion improvements in the vicinity of schools.
 - Application is attached
 - Noninfrastructure-related activities to encourage walking and bicycling to school, including public awareness campaigns and outreach to press and community leaders, traffic education and enforcement in the vicinity of schools, student sessions on bicycle and pedestrian safety, health, and environment, and funding for training, volunteers, and managers of safe routes to school programs.
- Constructing boulevards and other roadways largely in the right-of-way of former Interstate System routes or other divided highways.

2 Project Description: (all of the following items are **required** - applications without this information will not be reviewed)

Road Name: NW North Macedo Boulevard

Road Number: Local Road State Road

Project Limits: Begin: St. James Drive End: Selvitz Road

Begin Project Mile Post (MP): End Project MP:

A location map with an aerial view is attached. (Location_Map.pdf)

(a) What is the scope of work for the project and where is the project located (what are the termini)?

A more detailed scope of work is attached. (Use attached Scope.doc)

Construct a 5-foot wide concrete sidewalk on the south side of North Macedo Boulevard between St. James Drive and Selvitz Road.

- (b) Summarize any special characteristics of project. Include a Typical Section depicting existing and proposed features and dimensions and right of way lines
- Typical section is attached (Typical_Section.pdf)

The attached typical section depicts a 5-foot sidewalk being constructed 10-feet off the edge of pavement with open swale drainage behind the sidewalk.

- (c) **Right-of-Way acquisition is NOT permitted for Transportation Alternatives projects.** Describe the project's existing Right-of-Way ownerships. This description shall identify when the Right-of-Way was acquired and how ownership is documented (i.e. plats, deeds, prescriptions, certified surveys, easements).
- No Right-of-Way acquisition is proposed

The existing right-of-way is owned and maintained by the City of Port St. Lucie

- (d) Display the existing ownership with Right-of-Way maps to verify that all proposed work is within existing Right-of-Way currently owned by the Project Sponsor. Provide required right-of-way documentation (Right-of-Way.pdf):
- Right-of-Way maps are attached
- Plats, deeds, prescriptions, certified surveys, and/or easements are attached

- (e) Describe any related project work phases that are already complete or currently underway.
- This is not a phased project
- Previous phases of this project were constructed as LAP projects or JPA using FM numbers

- (f) Provide detailed project cost estimate. Estimate shall be broken down to FDOT typical pay items to allow for verification of eligible project costs. **Estimates are to be prepared and signed by a Professional Engineer from the Local Agency's Engineering office.**

Use the following links to access the basis of estimates manual as well as historical cost information for your area:

[Basis of Estimates Manual](#)

[Historical Cost Information](#)

- A detailed cost estimate is attached (Use attached Estimate.xlsx)

- (g) Other specific project information that should be considered.

This project will benefit Parkway Elementary School and the businesses located at the west end of this project. This project would connect to an existing sidewalk on St. James Boulevard and Selvitz Road which will greatly contribute to the connectivity that the City is trying to achieve.

3 Project Implementation Information:

Attach documentation as exhibits to this application.

- (a) Describe the proposed method of performing (i.e. contract or in-house) and administering (i.e. local or state) each work phase of the project. If it is proposed that the project be administered by a governmental entity other than the Department of Transportation, the Agency must be certified to administer Federal Aid projects in accordance with the Department's **Local Agency Program Manual (topic no. 525-010-300)**. Web site: www.dot.state.fl.us/projectmanagementoffice/lap/default.htm

- Design to be conducted by in-house staff
- Design to be conducted by FDOT pre-qualified consultant ^{(1) (2)}
- Design to be conducted by non-FDOT pre-qualified consultant ⁽²⁾
- CEI to be conducted by in-house staff
- CEI to be conducted by FDOT pre-qualified consultant ^{(1) (2)}
- CEI to be conducted by non-FDOT pre-qualified consultant ⁽²⁾

⁽¹⁾ FDOT pre-qualified consultants must be used on all design and CEI work for critical projects (a project is considered critical when it features a structure, has a budget greater than \$10 million and/or is on the State Highway System (SHS))

⁽²⁾ Design consultant and CEI consultant shall not be the same.

- (b) Describe any public (and private, if applicable) support of the proposed project. (Examples include: written endorsement, formal declaration, resolution, financial donations or other appropriate means).

- (c) Describe the proposed ownership and maintenance responsibilities for the project when it is completed.

The ownership and maintenance of this sidewalk will be the sole responsibility of the City of Port St. Lucie.

- (d) Describe source of matching funds and any restrictions on availability.

The City of Port St. Lucie will incur all costs not covered by this grant.

- (e) Other specific implementation information that should be considered.

4 Cost Estimate:

The total amount of Transportation Alternative Program (TAP**) funds requested per projects (infrastructure) must be in excess of \$250,000 with a maximum of \$1,000,000 (though some T/MPO's may choose to use a lesser upper limit). Transportation Alternative Program funds will be used to fund Construction, Construction Engineering and Inspection Activities (CEI), and FDOT In-House Support Activities. Local Funds (LF) will be used for all non-participating items, contingency activities, and any costs in excess of the awarded alternatives (TAP) allocation.

Total Construction Cost Estimate: This is the total project construction cost estimate including all alternatives related items and any additional scope of work being identified.

Item Description	Cost \$
*(A) Total Construction Cost Estimate ⁽¹⁾	\$872,243.21
*(B) Cost Estimate of Eligible (participating) items ⁽²⁾	\$616,620.21

Funding Breakdown	Fund Source	Cost \$
*(C) FDOT In-House Design Support (phase 31) ⁽³⁾ or *(D) (Critical projects only) FDOT In-House Design Support (phase 31) ⁽³⁾	TAP	\$5,000.00
*(E) FDOT In-House Construction Support (phase 61) ⁽³⁾ or *(F) (Critical projects only) FDOT In-House Construction Support (phase 61) ⁽³⁾	TAP	\$5,000.00
*(G) TAP funds requested for Construction (phase 58)	TAP	\$616,620.21
*(H) Local Funds for Construction (phase 58)	LF	\$22,078.46
*(I) Local Funds for Contingency (required)	LF	\$127,739.73
*(J) TAP funds requested for Construction Engineering & Inspection (CEI) (phase 68 - optional) ⁽⁴⁾	TAP	\$73,994.43
*(K) Local Funds for Construction Engineering & Inspection (CEI) ⁽⁴⁾	LF	\$2,649.42
*(L) Transit Related projects FTA 10% administrative fees ⁽⁵⁾	LF	\$0
*(M) FDOT Oversight CEI (3% of TOTAL Construction Cost) (phase 62) ⁽⁶⁾	TAP	\$19,160.96

Funding Summary	
*(N) Total TAP funds	\$719,775.60
*(O) Total LF funds	\$152,467.61
*(P) Total Funds	\$872,243.21

*Letters before the descriptions in the cost estimate above relate to the detailed cost estimate spreadsheet (Cost_Estimate.xlsx) and should match the corresponding figures exactly.

** Use of the term TAP represents the actual funding codes of TALT, TALU and TALL.

Notes:

- (1) The Total Construction Cost Estimate in this field must be equal to the Total Construction Cost Estimate from the attached detailed project cost estimate.
- (2) Cost Estimate of Eligible (participating) items must be equal to the Subtotal FHWA Participating from the attached detailed project cost estimate.
- (3) FDOT In-House Design and Construction Support must be included in TAP funds for an amount no less than \$5,000, an additional \$2,000 is required for critical projects. This is a required item.
- (4) It is strongly recommended that the applicant allocates a nominal amount for CEI. In the event that the project is programmed without any request for Phase 68 funding, there is no opportunity to allocate CEI funds based on bid savings.
- (5) Any required Federal Transit Authority (FTA) administrative fees must be included in Local Funds.
- (6) FDOT Oversight CEI must be included in TAP funds and be equal to 3% of the Total Construction Cost Estimate.

5 Certification of Project Sponsor:

I hereby certify that the proposed project herein described is supported by the City of Port St. Lucie (municipal, county, state or federal agency, or tribal council) and that said entity will: (1) provide any required funding match; (2) enter into a LAP and maintenance agreement with the Florida Department of Transportation; (3) comply with the Federal Uniform Relocation Assistance and Acquisition Policies Act for any Right of Way actions required for the project, (4) comply with NEPA process prior to construction, this may involve coordination with the State Historic and Preservation Office (SHPO) prior to construction. (Not at time of application) and (5) support other actions necessary to fully implement the proposed project. I further certify that the estimated costs and/or failure to follow through on the project once programmed in the Florida Department of Transportation's Work program included herein are reasonable. I understand that significant increases in these costs could cause the project to be removed from the Work Program and/or significantly increase the local agency match required.

MEMORANDUM

TO: St. Lucie TPO Board

THROUGH: Peter Buchwald
Executive Director

FROM: Edward DeFini
Bicycle/Pedestrian Program Manager

DATE: May 25, 2016

SUBJECT: Walton Road Multimodal Improvements Feasibility Study

BACKGROUND

Walton Road from Lennard Road to Indian River Drive is a substandard roadway facility because it does not include shoulders or any pedestrian or bicycle facilities. The FY 2014/15 – FY 2015/16 Unified Planning Work Program (UPWP) for the St. Lucie TPO includes Task 4.1, *Walton Road Multimodal Improvements*. The objective of Task 4.1 is to conduct a feasibility study of potential multimodal improvements to this segment of Walton Road.

The attached Walton Road Multimodal Improvements Feasibility Study Preliminary Report includes a general analysis and evaluates potential widening and multimodal improvements. In order to consider improvements along Walton Road including bicycle and pedestrian infrastructure, the Final Walton Road Multimodal Improvements Feasibility Study will evaluate “fatal flaws” associated with existing right-of-way ownership for potential corridor improvements and include costs to mitigate existing engineering, right-of-way, environmental, and drainage constraints.

Stakeholder’s input and planning agency consensus is being obtained through continuous and cooperative efforts, and the planning activities are being coordinated with St. Lucie County, City of Port St. Lucie, SFWMD, and Savannas State Park.

ANALYSIS

The preliminary report was prepared by Stanley Consultants Inc. (SCI). SCI is one of the General Planning Consultants for the St. Lucie TPO. The preliminary report contains a general analyses of the existing conditions, bicycle and pedestrian mobility, and potential impacts and other environmental concerns.

The final results of the study will determine the feasibility of extending the existing sidewalk on the north side of Walton Road from SE Scenic Park Street to Green River Parkway or extending a shared-use path on the south side from east of SE Rainer Road to Green River Parkway and adding on-street bike lanes in both directions.

In addition, kayak crossing options will be evaluated in order to improve connectivity from the kayak launch, located in Savannas Preserve State Park south of Walton Road, to the portion of the park north of Walton Road. One option is for a kayak crossing under Walton Road through an arched culvert. A less costly option is to cross over Walton Road with a kayak portage which would require a mid-block pedestrian crossing signal and adequate ingress and egress from the waterway.

The TPO Advisory Committees reviewed the preliminary report at their meetings during the week of May 16th. The Technical Advisory Committee (TAC) determined that approximate costs for the typical section of Segment C should include costs to mitigate existing engineering, right-of-way, environmental, and drainage constraints. The TAC also recommended continued coordination with local agencies and requested input from the South Florida Water Management District, Savannas State Park, and the St. Lucie County School Board in order to determine the approximate costs to mitigate the constraints not included in the approximate costs determined to date. The TAC took the position that it would be better able to review, accept, or not accept the Walton Road Multimodal Improvements Feasibility Study once alternative cross sections were developed based on revised costs.

The BPAC, citing safety concerns with crossing Walton Road, recommended a sidewalk on the south side of Walton Road to connect the sidewalk on Lennard Road with the multi-use sidewalk on Green River Parkway. In addition, the BPAC considered two options for a kayak crossing in Segment C. One option is a portage (pedestrian crossing) where a kayaker carries a kayak over Walton Road. The other option is an underpass (navigable crossing) where a kayaker navigates a kayak under Walton Road. The BPAC rejected the portage and chose the more costly underpass citing safety concerns for kayakers carrying kayaks across Walton Road.

To cost effectively provide multimodal connectivity between Indian River Drive, which is part of the Treasure Coast Scenic Highway, and Green River Parkway, which is part of Florida's East Coast Greenway, the TPO Advisory Committees were open to consider the cost of a multi-use pedestrian boardwalk/bridge through Segment C to mitigate cost constraints associated with adding paved sidewalks, a drainage pond, and bicycle lanes to the segment.

RECOMMENDATIONS

Based on the initial input from the TPO Advisory Committees, it is recommended that the TPO Board discuss and provide comments on the Walton Road Multimodal Improvements Feasibility Study Preliminary Report.

Executive Summary

The St. Lucie Transportation Planning Organization (TPO) retained Stanley Consultants, Inc. to complete this preliminary feasibility study to evaluate multimodal improvements to the Walton Road corridor from Lennard Road to Indian River Drive. Walton Road is located within the limits of the City of Port St. Lucie and is owned and maintained by St. Lucie County. A demand for multimodal facilities exist in the surrounding study area due to residential and commercial land use, St. Lucie Civic Center, St. Lucie Medical Center, Savannas Preserve State Park, Woodstork Trail, existing off road shared use paths, and the National East Coast Greenway trail.

The recommended improvements are consistent with local transportation plans. The FY 2014/15 – FY 2015/16 Unified Planning Work Program (UPWP) for the St. Lucie TPO includes Task 4.1, Walton Road Multimodal Improvements. Sidewalk improvements to the Walton Road corridor from Lennard Road to SE Green River Parkway were second in the 2014/15 priority ranking, third on the 2015/16 list of priority projects (LOPP), identified as part of the Walk-Bike needs and network improvements, and included in the cost feasible plan for the recently adopted Go2040 St. Lucie TPO Long Range Transportation Plan (LRTP). Completing the missing link of off road shared use path from Lennard Road to SE Green River Parkway was included with the recommended preferred alternative in the Bicycle/Pedestrian Corridor Study Area of Interest Analysis completed by the St. Lucie TPO in 2011.

The entire study corridor spans approximately 1.9 miles with the roadway right of way (ROW) width varying from 50 feet to 150 feet. The study begins at Lennard Road as a four-lane section with bike lanes, sidewalk and off road shared use path for approximately 600 feet and then transitions into a two-lane section with no paved shoulders or bicycle facilities all the way to Indian River Drive at the end of the study. Sidewalks, bike lanes or shared use paths are not present between SE Scenic Park Street and Indian River Drive.

The study corridor was divided into three segments based on existing multimodal facilities, ROW width and recommended alternatives. Segment A is a four-lane divided roadway starting at Lennard Road and terminating 800 feet east of the intersection. This segment currently contains multimodal facilities on both sides of Walton Road and is the only segment with a four-lane typical section with divided median. Segment B is from the end of Segment A to SE Green River Parkway, with varying ROW width. The existing land use is residential, vacant parcel, private hospital to the south, and the Savannas Preserve State Park to the north. Segment C is a two-lane rural roadway from SE Green River Parkway to Indian River Drive. The extents of Segment C were based on the ROW width, guardrail through the Savannas Preserve State Park, and the FEC Railroad crossing.

An evaluation of existing traffic counts and future volumes for Walton Road was completed to determine if roadway widening would be required in the future. Based on the planning tables found in the 2013 Florida Department of Transportation Quality and Level of Service Handbook. Walton Road is expected to have a level of service C through the year 2040.

The following alternatives were evaluated in this preliminary study:

- **Segment A**
 - No recommended alternative due to existing acceptable multimodal features.
- **Segment B**
 - **Alternative B1** Roadway widening - extend sidewalk on north side of Walton Road from SE Scenic Park Street to Green River Parkway, extend shared use path from east of SE Rainer Road to Green River Parkway, add on-street bike lanes in both directions. Minimum ROW width required for this typical section is 65 feet.
 - **Alternative B2** Roadway reconstruction – reconstruct roadway with curb and gutter, extend sidewalk on north side of Walton Road from SE Scenic Park Street to Green River Parkway, extend shared use path from east of SE Rainer Road to Green River Parkway, add on-street bike lanes in both directions. Minimum ROW width required for this typical section is 65 feet
- **Segment C**
 - **Alternative C1** Roadway widening - sidewalk on north side of Walton Road from Green River Parkway to Indian River Drive, add on-street bike lanes in both directions. Minimum ROW width required for this typical section would be dependent on swale design and permitting requirement to meet water quality standards.
 - **Alternative C2** Roadway reconstruction – reconstruct the 2 lane roadway with curb and gutter, sidewalk on north side of Walton Road from Green River Parkway to Indian River Drive, add on-street bike lanes in both directions.
 - **Alternative C3** No roadway improvements – no roadway improvements but provide a separate 10-foot wide elevated shared use boardwalk structure

Kayak crossing options were evaluated for this segment in order to improve connectivity from the kayak launch south of Walton Road to the Savannas Preserve State Park to the north.

Additional options for Segment C:

- Kayak Crossing Under Walton Road – the option of adding an under road crossing for kayaks and other non-motorized watercrafts through an arch culvert. Raising of Walton Road would be needed to meet vertical clearance.
- Kayak Crossing Over Walton Road – the option of allowing multimodal water users to cross over Walton Road with a kayak portage was evaluated. The alternative would require a mid-block pedestrian crossing signal and adequate ingress and egress from the waterway.

Currently in Segment B one portion of the ROW is restricted to 50 feet due to Savannas Preserve State Park to the north and a vacant parcel owned by the St. Lucie County School Board. Based on coordination with the St. Lucie County School Board, the Board may be open to donating ROW

adjacent to Walton Road to add off road paths or sidewalks. Furthermore, an elevated boardwalk style structure, with a minimum width of 10 feet, with pedestrian railing is recommended between SE Arenson Lane and SE Belcrest Street.

The alternative C1 includes on-street bike lanes and sidewalk only on the north side of Walton Road. This recommended alternative could have minimal ROW impacts by elevating the north sidewalk with gravity wall with a pedestrian railing and guardrail on both sides of the roadway and design of the needed roadway swale. Alternative C2 evaluated the reconstruction of the roadway with curb and gutter. Preliminary drainage analysis found that the roadway would need to be elevated approximately four feet and ROW cost could be minimalized for a pond if St. Lucie County School Board is willing to donate land. A low cost alternative for Segment C includes adding an elevated 10-foot wide shared use path adjacent to the roadway and includes no roadway improvements. Sidewalk could not be provided on the south side of Walton Road due to ROW restrictions. In addition to the roadway improvements, two kayak crossing options were also evaluated for this segment.

Estimated costs for the recommended alternatives is listed in the table below. The cost estimate for Segment C includes a general \$145,000 cost for FEC railroad crossing improvements based on previous TIP projects within south Florida. The kayak options are not included in the total cost.

Segment	Alternative	Approximate Cost
Segment A (Lennard to 800' E of Lennard)	Maintain existing facilities	N/A
Segment B (800' E of Lennard to Green River Parkway)	B1	\$ 1,850,000
	B2	\$ 6,850,000
Segment C (Green River Parkway to Indian River Drive)	C1	\$ 3,100,000
	C2	\$ 6,500,000
	C3	\$ 1,150,000
Kayak Option Under		\$900,000
Kayak Option Over		\$115,000
Recommended Total Cost (B1+C3)		\$3,000,000

These recommended improvements would enhance pedestrian mobility, provide safety benefits to both bicyclists and pedestrians as well as provide potential connections to future trails.

1.0 Introduction

The St. Lucie Transportation Planning Organization (TPO) retained Stanley Consultants, Inc. to complete this preliminary report to evaluate multimodal improvements to increase connectivity along the Walton Road corridor from Lennard Road to Indian River Drive. The study corridor is approximately 1.9 miles, of which 1.5 miles lack existing pedestrian or bicycle facilities.

This preliminary report is consistent with several TPO transportation plans. It is identified in the adopted Go2040 St. Lucie TPO Long Range Transportation Plan (LRTP) as part of the TPO's Walk-Bike Needs and Network Improvements and Cost Feasible Plan. The FY 2014/15 – FY 2015/16 St. Lucie TPO Unified Planning Work Program (UPWP) includes Walton Road Multimodal Improvements. It is listed as second in the 2014/15 priority ranking and third on the 2015/16 list of priority projects (LOPP) as a Transportation Alternatives (TA) project for adding sidewalks, with project source listed as St. Lucie County School District. Furthermore, completing the missing link of off road shared use path from Lennard Road to SE Green River Parkway was included with the recommended alternative in the Bicycle/Pedestrian Corridor Study Area of Interest Analysis completed by the St. Lucie TPO in 2011.

1.1 Study Area

Walton Road from Lennard Road to Indian River Drive is located within the City of Port St. Lucie and is owned and maintained by St. Lucie County. Walton Road is classified as a Minor Arterial Urban roadway. Walton Road provides the only roadway, pedestrian or bicycle link between US 1 and Indian River Drive between Midway Road (6 miles north) and Jensen Beach Blvd (4 miles south).

The study begins at Lennard Road as a four-lane section for approximately 600 feet and transitions into a two-lane section with no paved shoulders or bicycle facilities all the way to Indian River Drive (the end of the study), with a roadway right of way (ROW) width varying from 50 feet to 150 feet.

The surrounding land use is predominantly residential and includes the Savannas Preserve State Park, a convenience store, churches, a private hospital, vacant school board property, and the Florida East Coast Railway (FECR) crossing at the east end of the project. The St. Lucie County School District owns a vacant property on the southeast corner of Walton Road and SE Belcrest Street. The Port St. Lucie Hospital (private hospital) is located on the southeast corner of Walton Road and SE Grand Drive.

Savannas Preserve State Park entrance is located on Walton Road within the study segment between SE Belcrest Street and SE Grand Drive. This park entrance provides access for hikers and bicyclists. The park contains over eight miles of multi-use trails for hiking, bicycling and horseback riding. The Greater Savanna Preserve Natural Area stretches for more than 10 miles from Ft. Pierce to Jensen Beach and it is the most intact remnant of Florida's east coast savannas.

The overall study area map is shown in **Figure 1.1**. The study corridor has several multimodal trip generators nearby. There is the large residential community, St. Lucie Civic Center, St. Lucie Medical Center, Port St. Lucie High School, Sandhill Crane Park, Wood Stork Trail, Savannas Preserve State Park hiking and kayak trails, Green River Parkway Trail, connections to the beach via Indian River Drive, and the National East Coast Greenway Trail.

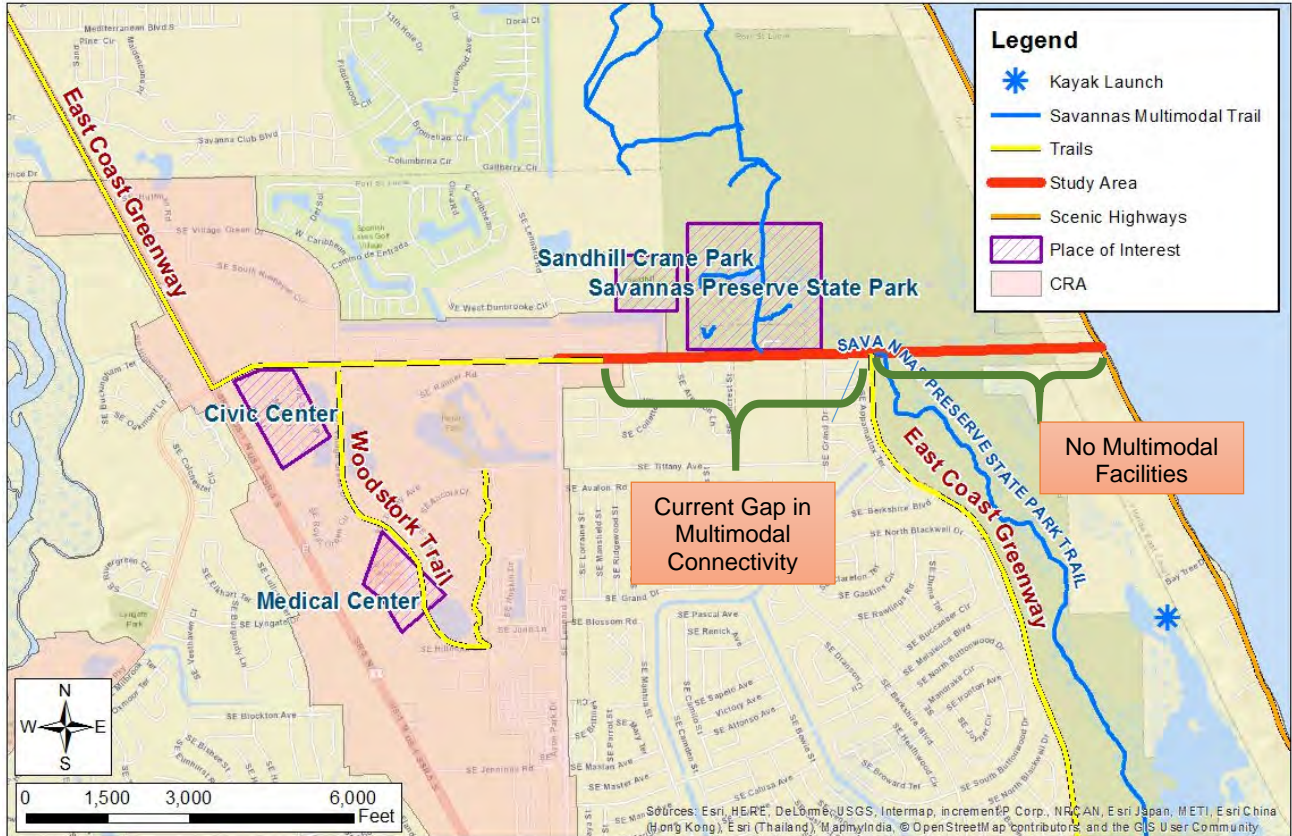

Figure 1.1 Overall Study Area

The National East Coast Greenway Trail is a 3,000-mile trail linking major cities along the Atlantic coastline from Maine to Florida. Within the Walton Road study segment, the East Coast Greenway Trail follows a variety of sidewalks and shared use paths. However, a multimodal gap exists and the national trail must utilize the two-lane rural roadside grass shoulder as the pathway until reaching the south connection that follows the Green River Parkway Trail. This study identifies improvements to fill the gap in the trail and complete other local trail and multimodal network connectivity.

The study corridor was divided into three segments based on the existing conditions and potential alternative solutions. These segments are described below and illustrated in **Figure 1.2**.

- **Segment A:** Begins at the intersection of Lennard Road and extends 800 feet east. This is where the four-lane divided roadway transitions to the two-lane rural section. The existing roadway segment contains multimodal facilities on both sides of Walton Road and is the only segment with a divided four-lane typical section.
- **Segment B:** Begins 800 feet east of Lennard Road and ends at SE Green River Parkway. This two-lane rural roadway has a ROW width from 50 ft to 150 ft. The existing roadway segment contains one sidewalk multimodal facility on the north side of Walton Road from the segment beginning to SE Scenic Park Street.

- **Segment C:** Begins at SE Green River Parkway and ends at Indian River Drive. This two-lane rural roadway has a ROW width that varies from 50 ft to 100 ft. The existing roadway segment contains no multimodal facilities.

Figure 1.2 Project Segment Map

1.2 Study Purpose and Need

The purpose of this study is to evaluate the feasibility of adding multimodal improvements along the Walton Road corridor between Lennard Road and Indian River Drive to improve multimodal connectivity, pedestrian and bicyclist safety.

There are no existing bike lanes or paved shoulders on the two-lane portion of Walton Road between Lennard Road and Indian River Drive. Several multimodal trails and pathways end at Walton Road due to the lack of multimodal facilities. Vehicles and multimodal users must share the roadway travel lanes or roadside within the two-lane rural section.

An existing twelve foot wide off-road shared use path begins west of the study corridor at US-1 and meanders along the south side of Walton Road stopping at the driveway access to Highpoint Community Church between Lennard Road and SE Rainer Road. **Figure 1.3** shows the end of the path within the study corridor on the east side of the Highpoint Community Church driveway. A need exists to connect this shared use path with the paved trail at the southeast corner of Walton Road and SE Green River Parkway. This connection would provide a cohesive, safe facility for the East Coast Greenway.

Figure 1.3 End of Shared Use Path

According to the East Coast Greenway website, the section of the trail on Walton Road from Lennard Road to SE Green River Parkway is described as “on-road routing” until it joins the Green River Parkway Trail. **Figure 1.4** shows the Green River Parkway Trail termini at Walton Road. A screenshot from the website showing the East Coast Greenway trail through the study corridor is included in **Appendix D**.

Figure 1.4 End of Green River Parkway Trail

Within the study corridor an existing six-foot wide sidewalk, shown in **Figure 1.5**, is located on the north side of Walton Road from Lennard Road to SE Scenic Park Street leading north to Sandhill Crane Park which is owned by the City of Port St. Lucie. There is a need to continue the sidewalk east to the Savannas Preserve State Park entrance and also provide a safe pedestrian connection to the existing paved Green River Parkway Trail.

Figure 1.5 Sidewalk on North

Walton Road crosses the Savannas Preserve State Park Multimodal Trail, designated for non-motorized recreational water craft. There is a kayak launch located south of the study area off of Riverview Drive, west of the FEC railroad. The kayak trail has a gap at Walton Road due to the lack of an over-the-road kayak portage or an under-the-road kayak culvert crossing. This multimodal feasibility study evaluates kayak alternatives in **Section 3.7** in order to improve connectivity of the kayak launch across Walton Road.

2.0 Existing Conditions Analysis

2.1 Physical

Assessing existing conditions along the corridor included data collection and analysis, office and field reviews and documenting deficiencies. Plans were requested and received from St. Lucie County Engineering Division for the Walton Road Widening (County Project No. 05-51) showing the typical section, sidewalk details and improvements east of Lennard Road. A field review was conducted on Thursday, March 24, 2016 to document existing conditions, identify deficiencies and verify information from the office review.

The existing ROW width varies along the Walton Road from 50 feet to 150 feet. Between Lennard Road and SE Scenic Park Street the existing ROW width is 150 feet and narrows to 100 feet just east of SE Belcrest Street. Adjacent to the parcel owned by St. Lucie County School District and the Savannahs Preserve State Park the existing ROW width is 50 feet and widens to 65 feet adjacent to Port St. Lucie Hospital, Inc. The existing ROW width is 80 feet west of SE Grand Drive to east of SE Green River Parkway and narrows to 50 feet through the Savannahs Preserve State Park. The existing ROW width is 100 feet from the FEC railroad crossing to Indian River Drive. The variation of ROW width is illustrated on the next page in **Figure 2.1**.

An existing raised median on Walton Road is present only within the four-lane section east of Lennard Road. The existing off-road shared use path on the south side is in good condition. Six foot wide concrete sidewalk exists along the north side between the beginning of the project at Lennard Road to SE Scenic Park Street and was found to be in good condition.

In the two-lane section the travel lanes were measured and found to be 11 feet wide for a total paved roadway width of 22 feet. The pavement condition for the two-lane section (Segment B & C) was found to be in good condition based on a full depth resurfacing of the existing roadway completed as a maintenance project by St. Lucie County in 2015.

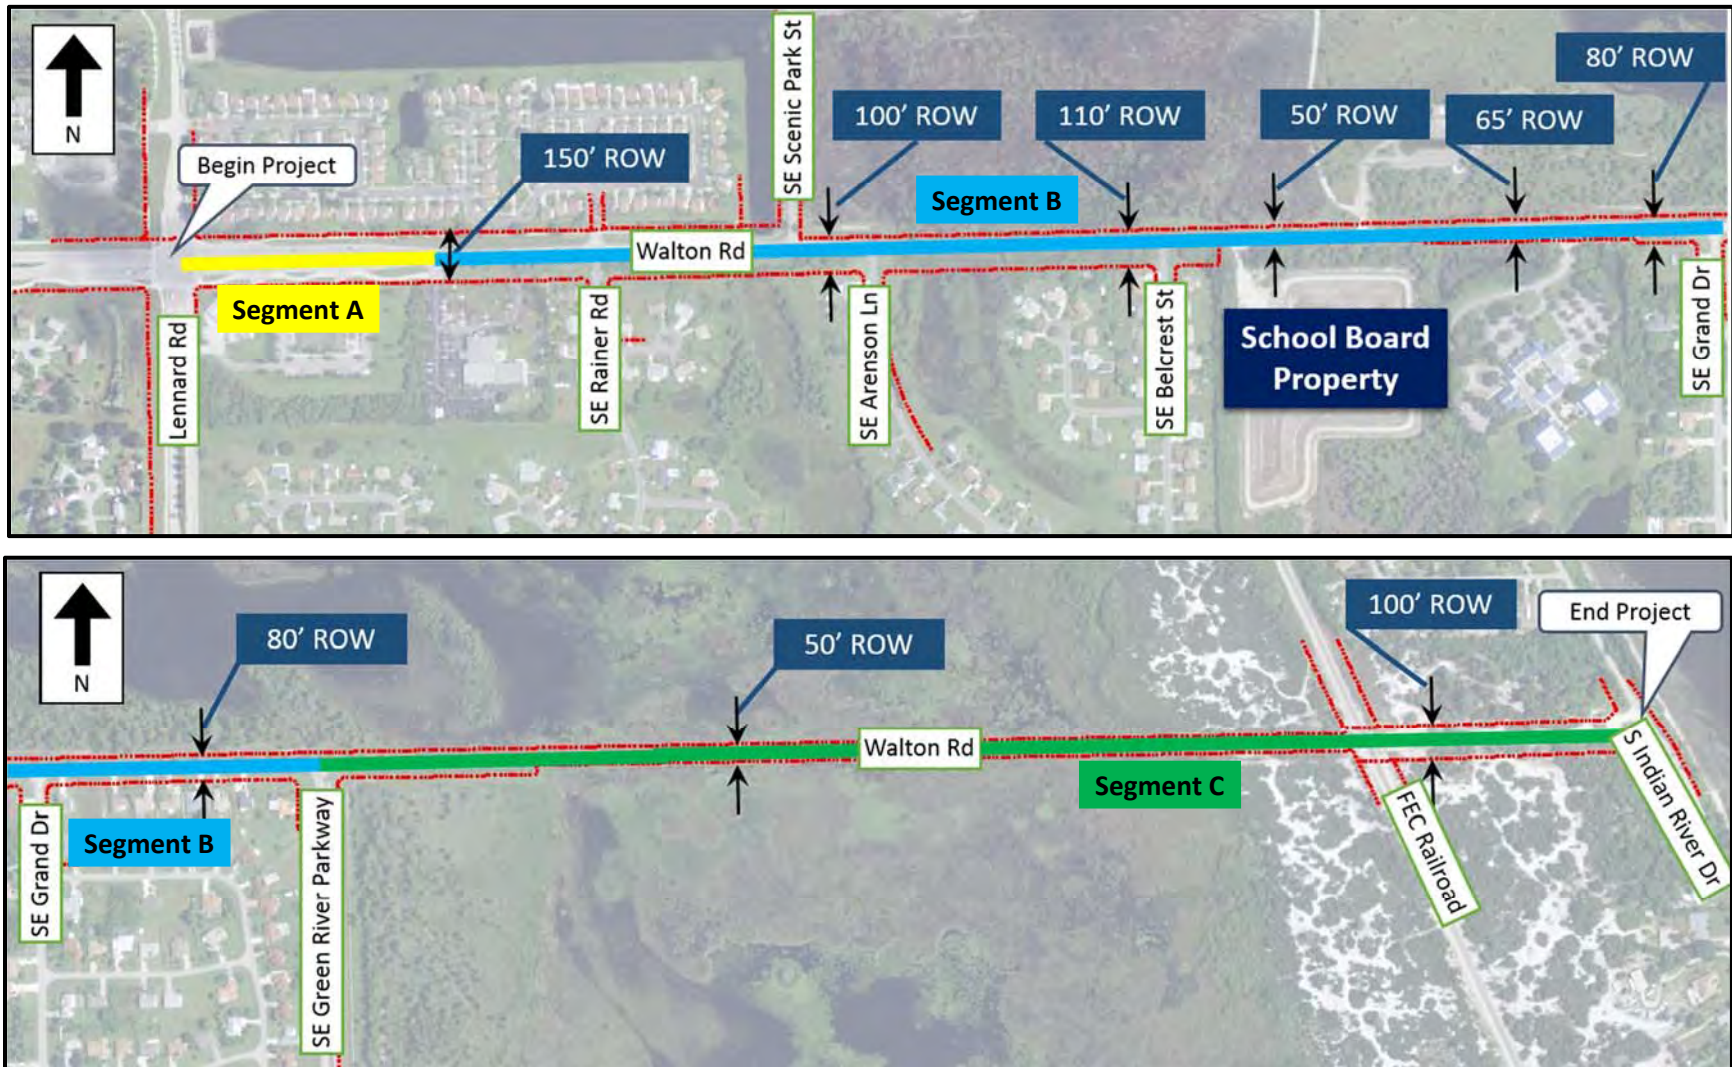

Figure 2.1 Existing Right Of Way

Segment C of Walton Road includes existing guardrail on the north and south side from SE Green River Parkway to the FEC Railroad crossing. The guardrail is damaged in some locations and measured to be approximately nine feet from the edge of pavement. A photo of damaged guard rail can be seen in **Figure 2.2**. The section of damaged guardrail appeared to be marked for maintenance. At some locations the existing guardrail has settled and is located beyond nine feet from the edge of pavement and in standing water. The study area experienced heavy rain prior to the field review.

Figure 2.2 Damaged Guardrail

Information was provided by St. Lucie County Public Works Department (SLCPWD) showing the approximate location of two 48" x 60' RCP and two 72" x 60' CPM culverts east of Green River Parkway. The approximate culvert locations can be seen in the existing conditions map found in **Appendix D** based on a hand sketch provided from St. Lucie County. Additional information provided by SLCPWD verified that a permit was issued by the United States Army Corps of Engineers for the cleaning and restoration of the existing pipes and the work was completed in 1999. Existing cross culverts under Walton Road east of SE Green River Parkway were not visually located and could not be verified during the field review. The culverts should be evaluated due to age and environmental conditions.

Figure 2.3 Intersection Lighting

Street lighting in Segment A was located along the north and south side east of Lennard Road and terminated where the roadway transitions from four lanes to two lanes, approximately 800 feet east of the intersection. Intersection lighting is located at the following intersection locations along the study corridor: the northeast corner of SE Scenic Park Street, the southwest corner of SE Grand Drive, and the southwest corner of SE Green River Parkway. A photo of intersection lighting on a single pole can be seen in **Figure 2.3**. Existing overhead utilities are present along the south side of Walton Road and appeared to be within the 20-foot utility easement located adjacent to the existing ROW line shown on the widening plans provided from St. Lucie County. The existing overhead utility lines located on the south side stop east of SE Green River Parkway and continues underground to just west of the FEC Railroad crossing and then continues overhead to Indian River Drive. **Appendix D** provides a detailed map of existing conditions.

No transit stops are currently located within the study corridor, nor do any transit routes pass through the corridor. An exhibit showing nearby transit stops and routes can be found in **Appendix E**.

2.2 Operation

Evaluation of the average vehicle speed was completed based on speed data collected at three locations along the corridor on Thursday March 17, 2016. The posted speed on the study corridor is 45 mph and a posted speed limit sign can be seen in **Figure 2.4**. The results from the data collected east of Lennard Road, as well as east and west of SE Green River Parkway indicate the 85th percentile speed is 43 MPH. The posted speed for Walton Road is 45 MPH. The collected speed data can be found in **Appendix A**.

Field observations confirmed that roadway operating conditions along the corridor and the stop controlled intersections are satisfactory. All stop controlled intersections within the study corridor were observed to operate at an acceptable level of service for vehicles. Several bicyclists were observed sharing the roadway with vehicles.

Figure 2.4 Speed Limit Sign

The current access control is limited to a raised median within the four-lane section east of Lennard Road as well as right and left turn lanes at SE Powderly Place/SE Rainer Road intersection, SE Scenic Park Street and the driveway access to Port St. Lucie Hospital west of SE Grand Drive.

2.3 Safety

A review of crash data received from TPO staff for the most recent 5-year period from 2011-2015 was performed to evaluate safety conditions along the corridor within the study limits.

Table 2.1 Crash Distribution by Year

Year	Number of Crashes
2011	3
2012	2
2013	2
2014	9
2015	12
Total Crashes	28

A total of 28 crashes occurred within the study limits from 2011 to 2015 and is represented in **Table 2.1**. A significant increase in crashes is apparent between year 2013 and 2014. The largest number of crashes reported for year 2015 with twelve crashes, followed by 2014 with nine crashes. A more detailed crash analysis was completed for 2014 and 2015 due to the large increase of crashes and is presented later in this section.

The crash distribution by location was also analyzed and illustrated in **Figure 2.5**. The intersection with the most amount of crash incidents for the study corridor during the five year period was Lennard Road with nine crashes, followed by Indian River Drive with eight crashes. Seven out of the nine crashes that occurred at Lennard Road were “rear end” crashes, with one crash reported as “other” and one “bicycle” crash. The large number of “rear end” crashes at this intersection could be due to congestion at the intersection signal. Three “rear end”, three “run off” road, and two “other” crashes make up the eight collisions reported for the Indian River Drive intersection. At SE Green River Parkway four out of five of the collisions were “left turn” crashes and one was an “off road” crash. No “pedestrian” collisions were reported for the study corridor. The crash data can be found in **Appendix C**.

Figure 2.5 Five Year Crash Distribution by Intersection Location

Table 2.2 shows that the majority of crashes occurred during clear conditions. The study corridor does not have a pattern of crashes occurring in wet/rainy conditions.

Table 2.2 Crash Distribution by Weather Condition

Weather Condition	Number of Crashes
Clear	24
Cloudy	1
Rain	2
Fog, Smog, Smoke	1

The majority of crashes occurred in the daylight condition, as shown in **Table 2.3**. Only four crashes were reported in dark, unlit conditions and one dark crash did not report the lighting condition. Including the unknown lighting crash the percentage of crashes that occurred in dark is 18%.

Table 2.3 Crash Distribution by Lighting Condition

Lighting Condition	Number of Crashes
Daylight	19
Dawn/Dusk	2
Dark - Lighted	2
Dark - Not Lighted	4
Dark - Unknown Lighting	1

Table 2.4 illustrates that Rear End collisions account for the largest percentage of collision type with 12 crashes and 43%. The next major collision type is Off-Road with 6 crashes and 21%. Left Turn crashes was the third most reported collision type with 14% of the crashes within the study corridor. There was one reported bicycle crash that occurred at Lennard Road.

Table 2.4 Crash Distribution by Collision Type

Collision Type	Number of Crashes
Rear End	12
Left Turn	4
Off-Road	6
Bicycle	1
Other	5

Further analysis was completed to evaluate the large increase of crashes from 2013 to 2014 and from 2014 to 2015. **Table 2.5** and **Table 2.6** illustrate the detailed analysis completed for the year 2014 by crash location and crash type.

Table 2.5 Location Distribution Year 2014

Intersection Location	Number of Crashes
Lennard Road	3
SE Grand Drive	1
Between Grand Drive & Green River	0
SE Green River Pkwy	2
Indian River Drive	3

Table 2.6 Crash Type for Year 2014

Collision Type	Number of Crashes
Rear End	3
Left Turn	2
Off Road	3
Bicycle	0
Other	1

All the crashes for 2014 were analyzed by location and crash type in order to determine if a pattern exists to explain the jump from two crashes in 2013 to nine crashes in 2014. Lennard Road and Indian River Drive were reported to have three crashes each. The most common crash type for 2014 was rear end crashes and 3 off road crashes. The three crashes that occurred at Lennard Road were two rear end crashes and one other crash. The three crashes that occurred at Indian River Drive consisted of one rear end crash and two off road crashes.

Further detailed crash analysis was also completed for year 2015 and can be seen in **Table 2.7** and **Table 2.8**.

Table 2.7 Location Distribution for Year 2015

Intersection Location	Number of Crashes
Lennard Road	5
SE Grand Drive	0
Between Grand Drive & Green River	2
SE Green River Pkwy	1
Indian River Drive	4

Table 2.8 Crash Type for Year 2015

Collision Type	Number of Crashes
Rear End	7
Left Turn	0
Off Road	2
Bicycle	0
Other	3

It can be seen in **Table 2.7** that for the year 2015 five crashes occurred at the intersection of Lennard Road. Further analysis revealed that all five of those crashes are rear end crashes. Out of the four crashes that occurred at Indian River Drive, two were rear end crashes and two were other crashes.

From conducting additional analysis for 2014 and 2015 it can be concluded that more crashes occurred on Walton Road at the intersections of Lennard Road and Indian River Drive. Rear end crashes could have occurred more frequently in 2014 and 2015 due to multiple reasons including driver error/distraction and/or congestion.

2.4 Traffic

Existing traffic volume data was collected on March 17, 2016 at three locations along the corridor. The average daily traffic (ADT) for the location east of Lennard Road is 9,997 vehicles per day. The location west of Green River Parkway has an ADT of 8,625 vehicles per day and east of SE Green River Parkway the ADT is 6,285. The daily traffic volumes from the count data appear to be consistent when compared to the annual average daily traffic (AADT) shown in the St. Lucie County TPO Traffic Counts and Level of Service Report Fall 2015. The AADT from Lennard Road to SE Green River Parkway is 9,600 and the ADT from SE Green River Parkway to Indian River Drive is 5,700. Based

on the 2016 ADT, the roadway is operating at an acceptable level of service (LOS) C for a two-lane undivided urban minor arterial.

Future volumes were provided for Walton Road from the TPO consultant working on the Go2040 LRTP. The 2040 future volumes are from the TCRPM 4 model and are still under review but were used for the adopted 2040 Cost Feasible alternative analysis for the LRTP update. These future volumes and the St. Lucie County TPO 2015 AADT are represented in **Table 2.9**.

Table 2.9 Traffic Volumes and LOS for Walton Road

Walton Road Section	2015 AADT	2040 Volumes	Future LOS
Lennard Road to Green River Pkwy	9,600	12,480	C
Green River Pkwy to Indian River Drive	5,700	9,600	C

A preliminary LOS analysis was completed for the expected future year volumes of 2040 using the Florida Department of Transportation Generalized Level of Service tables from the most recent (2013) Quality/Level of Service Handbook. For an urban undivided two lane roadway section with a speed greater than 40 mph, the LOS AADT volume threshold is 15,120. This volume accounts for the roadway being a non-state signaled roadway. The predicted future 2040 volume meets the threshold for a two-lane undivided roadway. Therefore, the need for capacity improvements are not expected.

2.5 Environmental Conditions

A review of existing environmental conditions for the study corridor was completed. According to the U.S. Fish and Wildlife Service National Wetlands Inventory database there are wetlands adjacent to the study corridor. The wetland map can be seen in **Figure 2.6**.

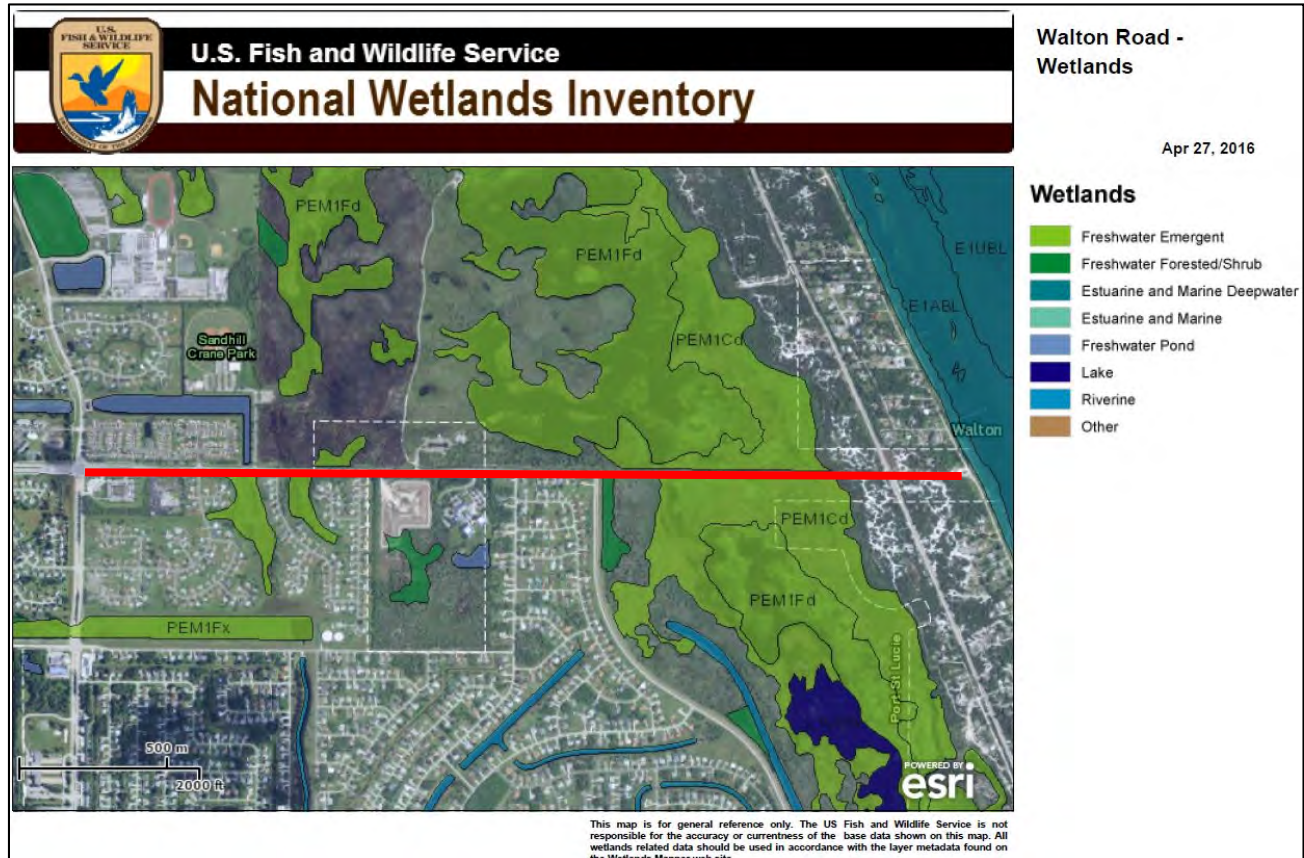

Figure 2.6 Wetland Map

Generally the area beyond the roadside shoulders are wet and contain pools of water. A photo of the wetlands observed between SE Arenson Lane and SE Grand Drive is shown in **Figure 2.7**.

A preliminary review of threatened and endangered species within the study corridor revealed a total of 26 species and 35 migratory birds using the Information for Planning and Conservation (IPaC) tool from the U.S. Fish & Wildlife Service website. Some notable endangered species that have a potential to be located throughout the study area include the Everglade Snail Kite, Florida Scrub Jay, Wood Stork, and the Eastern Indigo Snake. A copy of the full report can be found in **Appendix A**.

Figure 2.7 Roadside Wetland

A preliminary review of historic and cultural resources was completed for the study corridor using GIS shapefiles obtained from the Bureau of Archaeological Research and can be seen in **Figure 2.8**. Two cultural sites related to transportation are located within the study corridor and one agricultural/transportation site is located near the study corridor to the north. Both the FECR corridor and Indian River Drive are listed as having historic transportation integrity. The FECR is eligible for National Register of Historic Places (NRHP) and Indian River Drive has not been evaluated by the State Historic Preservation Office (SHPO). The agricultural/transportation site located approximate 750 feet north of Walton Road on the west end near Lennard Road is called Hog Pen Slough Canal and was constructed to create dry land for agriculture and development. According to the Bureau of Archaeological Research January 2016 ArcGIS shapefile it is ineligible for NRHP.

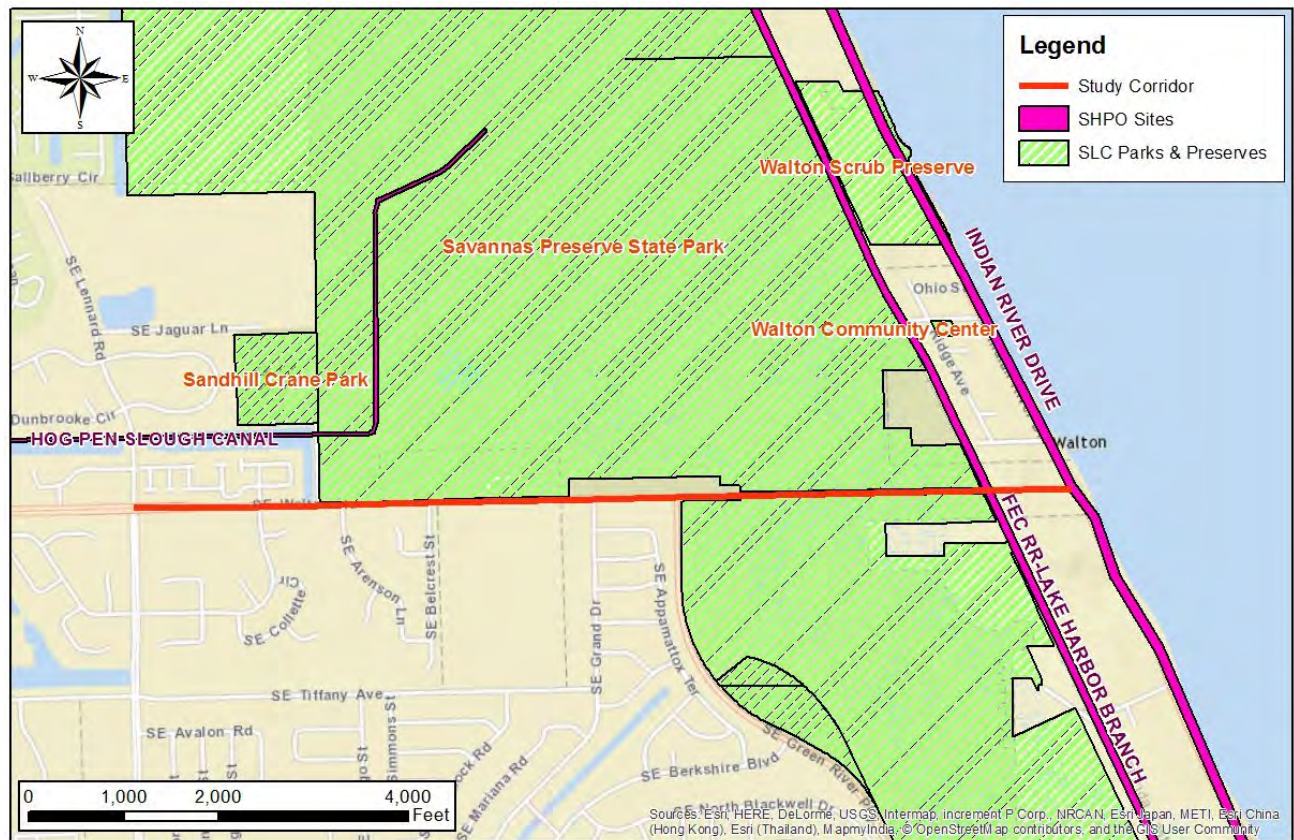

Figure 2.8 Historic and Cultural Sites

2.6 Deficiencies

During the office and field review the study corridor was analyzed to determine multimodal deficiencies including missing bicycle and pedestrian facilities, lighting, paved shoulders and signage. The following deficiencies were noted:

- There are no paved shoulders on the two-lane section east of Lennard Road to Indian River Drive as shown in **Figure 2.9**.
- The only pedestrian crossings within the corridor are located at Lennard Road.
- There is no existing sidewalk on the north side of Walton Road east of SE Scenic Park Street and no sidewalk on the south side beyond the existing off-road shared use path ending west of SE Rainer Road.
- There is no street lighting along Walton Road on the two-lane section east of Lennard Road to Indian River Drive except at the SE Scenic Park Street and SE Green River Parkway intersections.

Figure 2.9 Walton Road Two-Lane Section

3.0 Alternatives Evaluation

Existing multimodal facilities consisting of on-street bike lanes, off road shared use path and sidewalk are located within Segment A; therefore, no alternatives are presented for this study corridor segment. Alternatives for adding multimodal improvements in Segment B and C were evaluated based on a planning level analysis with respect to available right of way, connectivity to existing bicycle and pedestrian facilities, environmental and social-cultural factors as well as feasibility of implementation. Increasing mobility and improving safety for both bicycles and pedestrians by enhancing or expanding existing facilities was part of the evaluation process. There are no existing multimodal facilities on Indian River Drive. Multimodal improvements to Indian River Drive would require a separate study.

As stated in **Section 2.4**, the existing 2016 traffic volumes on Walton Road show that the two-lane section is operating at an acceptable LOS and projected 2040 traffic volumes indicate widening of the roadway is not expected to be needed to meet future capacity requirements. Therefore, roadway capacity improvements were not evaluated for this study. Alternatives presented in this section are summarized in **Table 3.1**.

Table 3.1 Summary of Alternatives

Segment	Alternatives
Segment A	Maintain existing multimodal features
Segment B	<ol style="list-style-type: none"> 1. Bike lanes, sidewalk, multiuse path 2. Curb and gutter – bike lanes, sidewalk, multiuse path
Segment C	<ol style="list-style-type: none"> 1. Roadway widening - add bike lanes & sidewalk 2. Roadway reconstruction with curb and gutter – add bike lanes & sidewalk 3. No roadway improvements – add raised boardwalk

Segment B has two alternatives; Alternative B1 includes four-foot paved shoulder bike lanes, a sidewalk on the north side and a shared use path on the south side, Alternative B2 reconstructs the roadway with curb and gutter and includes four-foot paved shoulder bike lanes, a sidewalk on the north side and a shared use path on the south side.

Three alternatives are presented for Segment C. Alternative C1 recommends widening the existing roadway and adding fill for paved bike lanes and sidewalk north along Walton Road with swale south of Walton Road for drainage. This alternative would require 11 feet of additional right of way through the Savannas Preserve State Park. Alternative C2 recommends reconstructing the roadway with curb and gutter, a pond and includes paved bike lanes and sidewalk north along Walton Road. The roadway would needed to be elevated approximately four feet for runoff to be routed to a proposed pond at the vacant school board parcel. A drainage report and analysis would need to be completed during design. In order not to require additional right of way this alternative was first evaluated to be raised on MSE wall with barriers. Constructing MSE wall through Savannas Preserve State Park would not be feasible due to animal crossings, hydrologic conductivity and aesthetics. Therefore,

Alternative C2 was evaluated with bank slopes that encroach outside of the existing ROW into the Savannas Preserve State Park. Permitting and mitigation would be required with federal agencies for construction and the encroachment of ROW. Some mitigation credits could be earned through the improvements presented in this alternative due to the addition of curb and gutter and if existing culverts are widened to improve hydraulic conductivity. A hydrologic study is recommended in order to optimize possible mitigation credits and water flow of the surrounding wetlands underneath Walton Road. Alternative C3 is a lower cost alternative for Segment C that proposes no roadway improvements and a separate elevated shared use 10-foot boardwalk structure north along Walton Road through Savannas Preserve State Park and continuing with a six-foot sidewalk west of the FEC railroad crossing to Indian River Drive. The elevated boardwalk may require some additional feet of ROW, depending on the design and placement of guardrail and the deflection distance to the boardwalk, only in the 50-foot ROW section that traverses through the State Park. All three alternatives for Segment C would require pedestrian crossing improvements at the FEC railroad crossing.

A pond will be needed if curb and gutter in Alternative B2 and C2 is placed along Walton Road. An option for placement could be the vacant parcel owned by St. Lucie County School Board. Substantial financial savings is possible if the School Board is willing to donate ROW for the pond. Furthermore, all alternatives in Segment C would require additional ROW and permitting with local agencies during design for construction.

3.1 Bike Lanes and Paved Shoulders

Adding on-street bike lanes or paved shoulders to the two-lane section in Segments B and C was evaluated based on increasing safety within the corridor and increasing bicycle mobility to existing surrounding bike paths. A four foot bike lane is the minimum functional width for a roadway without curb and gutter and flush shoulders per Chapter 9 of the Florida Green Book. In addition, paved shoulders four feet or wider may be marked as bicycle lanes and considered to be bicycle facilities.

Bicycle counts were taken during the AM and PM peak period on a weekday and also during the midday period on a weekend to evaluate existing bicycle usage along the corridor. The count data at the Lennard Road intersection indicated a low number of riders using the roadway but some bicyclists were observed riding on the existing off road shared use path. Data from the counts at the Green River Parkway intersection also showed a low number of riders overall with the largest number of bicyclists south of the intersection utilizing the shared use path. However, some bicyclists were observed riding east of Green River Parkway on Walton Road towards Indian River Drive reassessing the need of bike lanes for safety along this portion of roadway. The collected bicycle count data can be found in **Appendix A**.

There are two sections within the study corridor with existing ROW widths of 50 feet. One section is located east of SE Belcrest Street spanning the current vacant school board parcel and the other section is located from east of SE Green River Parkway to west of the FEC Railroad. A photo of the two-lane section with an existing 50 foot ROW width east of SE Green River Parkway is shown in **Figure 3.1**. Adding four foot wide bike lanes in each direction is feasible for both Segment B alternatives and in Segment C for the roadway widening (Alternative C1) and reconstruction (Alternative C2) alternatives.

Figure 3.1 Two Lane Section from Segment C

The cost for bike lane improvements was estimated using the FDOT Long Range Estimation System for milling and resurfacing a two-lane rural road with five-foot paved shoulders and will be included for the overall cost estimate for each alternative presented later in this section. A typical section diagram showing how bicycle lanes can be accommodated within the existing ROW width is also presented later in this section.

3.2 Sidewalks

Adding missing sidewalks and connecting residential areas to the Savannas Preserve State Park as well as increasing pedestrian access, safety and enhancing mobility was evaluated for the entire corridor.

Pedestrian counts were taken during the AM and PM peak period on a weekday and also during the midday period on a weekend to evaluate existing pedestrian usage along the corridor. The count data at the Lennard Road intersection showed no pedestrians using the sidewalk on the north side of Walton Road but some pedestrians were observed walking on the shared use path. During the field review one pedestrian was observed walking along the south side of Walton Road between SE Arenson Lane and SE Scenic Park Street as shown in **Figure 3.2**.

Figure 3.2 Pedestrian Walking Along Walton Road

Data from the count at the Green River Parkway intersection also revealed a low number of pedestrians overall and all observed pedestrians were using the existing paved trail on the east side of SE Green River Parkway south of Walton Road. The collected pedestrian count data can be found in **Appendix A**.

Adding six-foot wide sidewalk on the north side of Walton Road in Segment B between SE Scenic Park Street and SE Green River Parkway is feasible for both alternatives. Adding six-foot wide sidewalk on the north side of Walton Road from SE Green River Parkway to Indian River Drive in Segment C is feasible for all Alternative C1 and C2. There is possibility of portions of the recommended sidewalk traversing existing wetland areas requiring fill, gravity walls and lateral offsets to minimize impacts to environmentally sensitive areas. However, impacts to wetlands located in existing roadside swales within the ROW typically do not require mitigation. It is recommended that the quality of delineated wetland areas be evaluated during the design and permitting phases to make a determination of potential impacts and costs.

The estimated cost associated with only the sidewalk was based on projects listed in the latest St. Lucie TPO TIP and was estimated to be approximately \$390,800 per mile. Cost estimates for the improvements evaluated for each section is shown in **Table 3.2**. A typical section diagram showing how sidewalks can be accommodated within the existing ROW width is presented in **Figure 3.4** through **Figure 3.7**.

Table 3.2 Sidewalk Estimated Cost per Study Section

Segment	Sidewalk Cost
Segment A	N/A
Segment B (Alternatives B1 and B2)	\$281,000
Segment C (Alternatives C1 and C2)	\$313,000
Segment C (Alternatives C3)	\$98,000

3.3 Shared Use Path

Continuing the existing off-road shared use path on the south side of Walton Road in Segment B to the shared use path east of Green River Parkway was evaluated based on increasing both bicycle and pedestrian mobility for all users. Based on the Bicycle/Pedestrian Corridor Study Area of Interest Analysis completed by the St. Lucie TPO in November 2011, continuing the existing off-road path east of Lennard Road to the existing Green River Trail was included as part of the recommended preferred alternative. In addition to recommendations from previously completed studies, counts taken at both the Lennard Road and Green River Parkway intersections, documented that there is some current usage of the existing off road path and paved trail by both bicyclists and pedestrians. The collected bicycle and pedestrian count data can be found in **Appendix A**.

Continuing the meandering 12-foot wide off-road path, east of Lennard Drive, between the existing edge of pavement and 20-foot wide utility easement adjacent to the south ROW line is feasible in Segment B. However, there are some wetlands located within Segment B and minimal clearing and

grubbing and some added fill will be necessary or a boardwalk could be put in place. An elevated boardwalk style structure with pedestrian railing at a minimum of 10 feet wide would be the preferred type of improvement due to less impacts than an at-grade paved path. In order to reduce wetland impacts in Segment C, Alternative 3C recommends adding a 10 foot wide elevated boardwalk style structure on the north side of Walton Road through Savannas Preserve State Park and not implementing any improvements to the roadway. There are no shared use path improvements presented in Alternative C1 and C2.

The segment east of SE Belcrest Street adjacent to the parcel owned the St. Lucie County School District has an existing ROW width of 50 feet. Continuation of the 12' wide meandering off road shared use path along the south side in addition to on-street bikes lanes and sidewalk on the north side is not feasible within the existing ROW. Based on coordination with St. Lucie Public Schools, the property owned by the school district adjacent to Walton Road could be donated for ROW to add off-road shared use paths or sidewalks.

The estimated cost associated with only the shared use path improvements is shown in **Table 3.3**. The estimated costs were based on \$400,000 per mile of path. For the elevated boardwalk in Segment C a cost estimate of \$1,000,000 per mile was used after coordination with St. Lucie County Environmental Resources regarding the existing boardwalk in Savannas Preserve State Park. A typical section showing the shared use path improvements can be seen in **Figure 3.4** through **Figure 3.7**.

Table 3.3 Shared Use Path Estimated Cost per Study Section

Segment	Shared Use Path Cost
Segment A	N/A
Segment B (Alternatives 1B and 2B)	\$368,000
Segment C (Alternatives 3C)	\$600,000

3.4 Pedestrian Crossings

Pedestrian crossings at the SE Belcrest Street and SE Green River Parkway intersections are recommended for better connectivity from residential areas along the south side of Walton Road to Sandhill Crane Park and Savannas Preserve State Park located on the north side of Walton Road. **Figure 3.3** shows an example of a proposed pedestrian crossing conditions following Florida Green Book standards.

Cross walk markings with a minimum of a Pedestrian Warning Sign (W11-2) and diagonal downward pointing arrow (W16-7P) plaque together with a roadside flashing beacon assembly or rectangular rapid flashing beacon would be a benefit to pedestrian

Figure 3.3 Example of Pedestrian Crossing on Green River Parkway

supplemental ahead (W16-15P) plaque are also recommended in advance of all cross walk markings as an added safety benefit. The location of these recommended improvements can be found in **Appendix F**.

3.5 Alternative Typical Sections

There are several alternatives presented in this study for the Walton Road corridor from Lennard Road to Indian River Drive. Due to existing conditions no multimodal improvements for Segment A, were recommended.

The typical section for Alternative B1 recommended for Segment B can be seen in Figure 3.4. In Alternative B1; bicycle lanes are recommended for both travel directions on four-foot paved shoulders with sufficient pavement markings and signs. The shared use path is recommended to extend from 800 feet east of Lennard Road on the south side of Walton Road to connect with the shared use path east of Green River Parkway providing off road connectivity for the East Coast Greenway. The sidewalk on the north side of Walton Road is recommended to extend from SE Scenic Park Street to Green River Parkway. The minimum ROW requirement for this typical section is expected to be 65 feet with 11-foot roadway widths, four-foot bike lanes, five to six-foot sidewalk, and 10 to 12-foot shared use path.

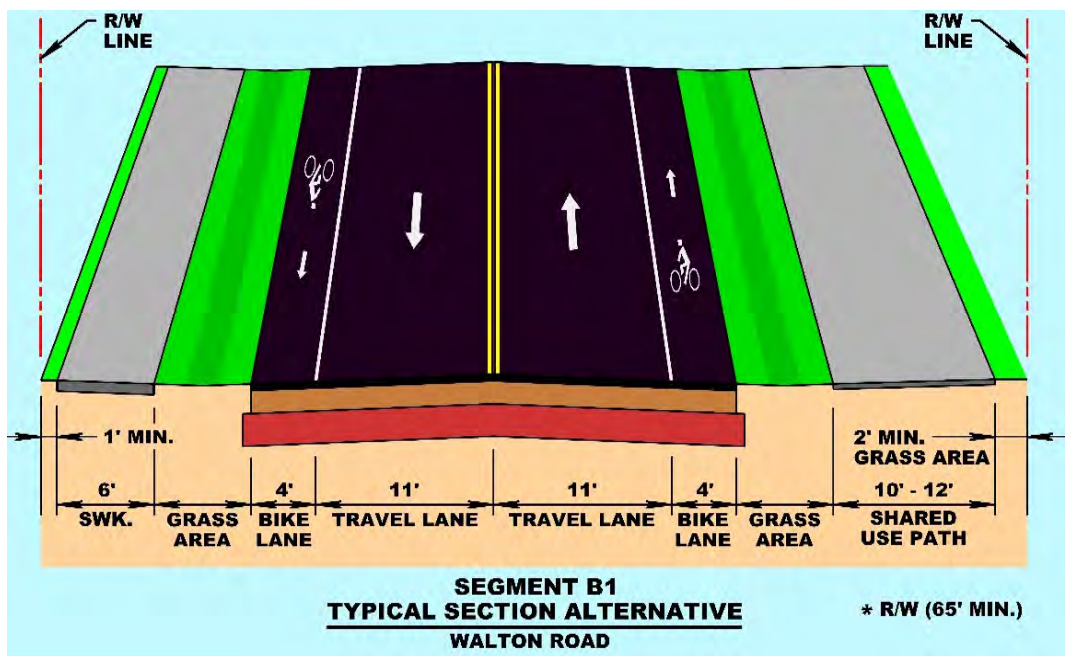

Figure 3.4 Alternative B 1 Typical Section

A second alternative obtainable for Segment B is Alternative B2, which provides the same multimodal improvements of Alternative B1 but includes the addition of curb and gutter along both sides of Walton Road. Currently there is curb and gutter along the four lane section of Walton Road east of Lennard Road. If a curb and gutter typical section is implemented in Segment C, a curb and gutter typical section should also be put in place for Segment B.

The typical section for the Alternative C1 can be seen in Figure 3.5. Alternative C1 is a roadway widening that proposes bicycle lanes for both travel directions on four-foot paved shoulders with

sufficient pavement markings and signs, sidewalk on the north side of Walton Road to extend to Indian River Drive on gravity wall with a pedestrian railing and separated from the bike lane with a two-foot shoulder and three-foot guardrail, and a swale and guardrail are recommended on the south side. Sidewalk could not be provided on the south side of Walton Road due to ROW restrictions.

In order to reduce impacts to surrounding wetlands and State Park the typical section recommends 11-foot roadway widths, four-foot bike lanes and five to six-foot sidewalk. Preliminary calculations indicate 0.60 acre feet is needed to meet water quality criteria. This can be accomplished within a roadside swale. Florida Greenbook required the bottom width of a new swale to be four feet. A drainage analysis and report is recommended during the design phase to support the permitting requirements.

Figure 3.5 Alternative C1 Typical Section

Due to the additional ROW needed to accommodate the swale in Alternative C1 another typical section for Segment C was evaluated with curb and gutter. Alternative C2 can be seen in Figure 3.6. Alternative C2 proposes roadway reconstruction and elevating the roadway by approximately four feet in order to route runoff to a proposed pond located west of Segment C at the St. Lucie School Board's vacant parcel.

In order to reduce ROW impacts Alternative C1 was first evaluated with MSE wall and barrier but this is not considered feasible since it does not promote wildlife crossings or recreational use. The alternative was then carried forward with roadside slopes that will encroach beyond the existing ROW.

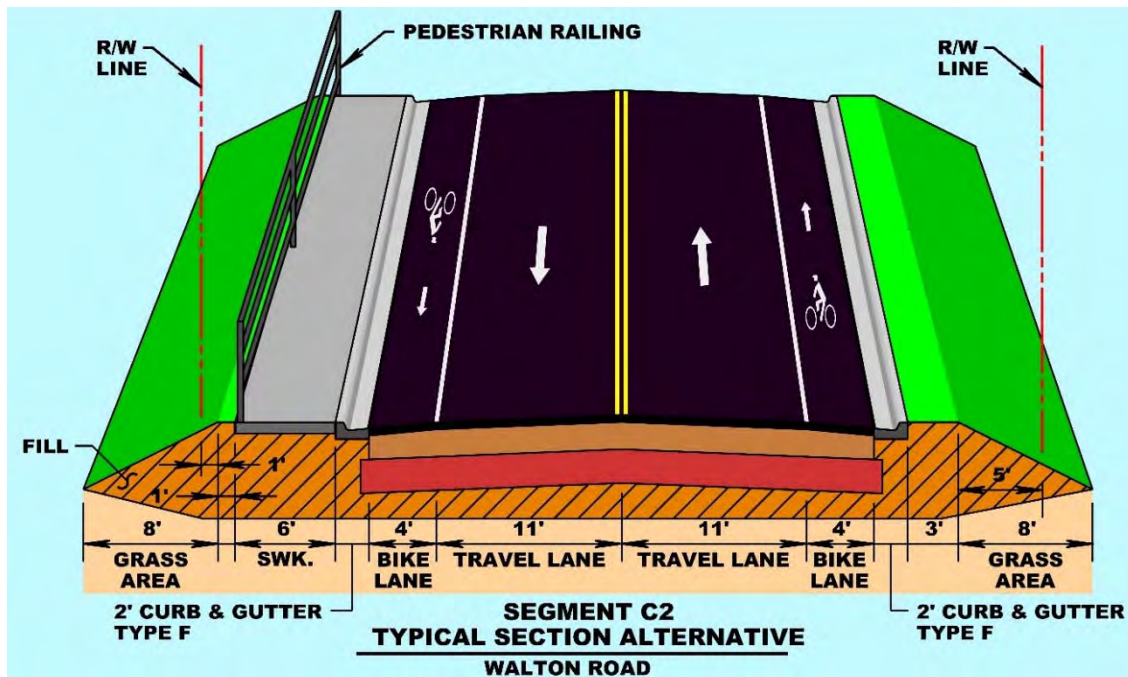

Figure 3.6 Alternative C2 Typical Section

A third alternative was evaluated for Segment C that has no roadway improvements but provides an elevated shared use boardwalk structure. Alternative C3 can be seen in Figure 3.7. This alternative is a lower cost alternative.

Figure 3.7 Recommended Alternative for Segment C Typical Section

Discussion with the St. Lucie County Environmental Resources Department found that they are currently applying for multimodal improvements for Walton Road from Green River Drive west to the entrance of Savannas Preserve State Park through a Sun Trail funding application. They are also trying to re-route the east coast Greenway Trail through the park which would require DEP to provide easement for a boardwalk trail structure. A telephone record can be found in Appendix F.

3.6 Total Alternative Costs

As stated in Section 3.1 the cost for adding bicycle lanes was estimated using the FDOT Long Range Estimation System for milling and resurfacing a two-lane rural road with five-foot paved shoulders. This estimated cost is provided by the FDOT per mile of roadway and can be seen in Appendix F. The estimated cost for milling and resurfacing the two-lane roadway as well as the addition for bicycle lanes for each study segment can be seen in Table 3.4.

Table 3.4 Estimated Roadway and Bike Lane Cost

Segment	Milling and Resurfacing with Bike Lanes
Segment A	N/A
Segment B (Alternatives B1 and B2)	\$392,000
Segment C (Alternatives C1)	\$341,000

Alternative C2 proposes adding bike lanes with a reconstruction of the current roadway with curb and gutter and elevating the roadway four feet. A preliminary planning level estimate of these improvements can be seen in **Table 3.5** below.

Table 3.5 Segment C Cost Estimate for Reconstruction

Description	Unit	Price	Approximate Cost
Embankment and Fill (CY)	18,245.00	\$ 20.90	\$ 381,320.50
Roadway with 5' paved shoulders (mile) - curb & gutter, inlets	0.8	\$ 4,200,000.00	\$ 3,360,000.00

A total of each roadway and multimodal improvement estimated cost per each alternative can be seen in **Table 3.6**. Contingency, maintenance of traffic, preliminary engineering and design and construction engineering and inspection was approximated at 10% construction cost. The cost estimation for Segment C includes an estimated \$145,000 FEC railroad crossing improvements cost.

Table 3.6 Total Alternative Cost Estimate

Segment	Alternative	Approximate Cost
Segment A (Lennard to 800' E of Lennard)	Maintain existing facilities	N/A
Segment B (800' E of Lennard to Green River Parkway)	B1	\$ 1,850,000
	B2	\$ 6,850,000
Segment C (Green River Parkway to Indian River Drive)	C1	\$ 3,100,000
	C2	\$ 6,500,000
	C3	\$ 1,150,000

3.7 Other Multimodal Alternatives

Other multimodal alternatives were considered for this feasibility study due to the expressed intent of the St. Lucie TPO to improve connectivity of the kayak launch located south of the study area to the area of Savannas Preserve State Park north of Walton Road. Currently Walton Road divides the multimodal trail of Savannas Preserve State Park. Two options were evaluated and presented in the following sub sections.

3.7.1 Crossing Under Walton Road Option

Currently there are four culverts located under Walton Road in Segment C. It could be considered to replace one these culverts with an arch culvert large enough to accommodate multimodal users in the savannas to gain access and connectivity within the park. The arch culvert would need to be placed on adequate foundations, roadway embankment will be needed for the roadway to pass over the culvert, MSE wall to retain the embankment in minimal ROW conditions, and have a five-foot minimum required vertical clearance between the low member and the design high water table elevation. Other considerations for the culvert include enough natural daylight passing through the 50 foot long section for safety and user encouragement. A rough estimate for this option is approximately \$900,000.

3.7.2 Crossing Over Walton Road Option

Another option that could be considered in order to improve the connectivity of Savannas Preserve State Park for multimodal water users is a kayak/canoe portage where users would carry their non-motorized watercraft over Walton Road. Adequate ingress and egress structures or embankment would be needed for all users to be able to access the portage and a mid-block pedestrian crosswalk with a button control signal would need to be provided. A rough estimate for this option is approximately \$115,000.

4.0 Conclusions and Recommendations

4.1 Conclusions

Based on data collected and information received during the office and field reviews, an analysis of the Walton Road corridor existing conditions showed there are deficiencies with bicycle, pedestrian and transit facilities as well as street lighting. For the purpose of this report the corridor was divided into three segments as seen in **Table 4.1**.

Table 4.1 Study Corridor Segment Description

Segment Name	Description
Segment A	Lennard Road to 800' east of Lennard Road
Segment B	800' east of Lennard Road to Green River Parkway
Segment C	Green River Parkway to Indian River Drive

Deficiencies found within the study corridor include: no bike lanes or paved shoulders in Segment B and C, sidewalk missing in Segment B and C, no pedestrian access to Savannahs Preserve State Park in Segment B, and a gap in the existing off-road shared use path on the south side of Walton Road to Green River Parkway for the East Coast Greenway. The existing roadway physical and operating conditions were documented. Walton Road has excess capacity based on existing and projected traffic volumes, and an 85th percentile speed of 43 MPH which is below the posted speed of 45 mph. The evaluation found that there is not sufficient ROW width for incorporating recommended multimodal improvements. However, the property owned by the school board may be needed for stormwater management and temporary construction easements for Alternative C. In addition Alternative C1 requires ROW acquisition.

Field observations confirmed that the roadway operating conditions along the corridor and the stop controlled intersections are satisfactory. According to the field review all intersections within the study corridor appeared to operate at an acceptable level of service for vehicles. Several bicyclist and pedestrians were observed sharing the roadway. A review of crash data received from TPO staff for the most recent 5-year period from 2011-2015, found a total of 28 crashes occurred within the study limits. No “pedestrian” collisions were reported and one “bicycle” crash occurred within the study corridor at the intersection of Lennard Road. However, there is a need for multimodal improvements within the corridor to enhance mobility, connect existing shared use paths, and provide pedestrian access to Savannahs Preserve State Park.

Consistency plan research for the Walton Road segment from Lennard Road to SE Green River Parkway found it was second in the 2014/15 priority ranking and third on the 2015/16 list of priority projects (LOPP) as a Transportation Alternatives (TA) project for adding sidewalks. The project source is listed as St. Lucie County School District. The study corridor was also identified in the recently adopted Go2040 St. Lucie TPO Long Range Transportation Plan (LRTP) as part of the County’s Walk-Bike Needs and Network Improvements and Cost Feasible Plan. Furthermore, completing the missing link of off-road shared use path from Lennard Road to SE Green River

Parkway was included with the recommended preferred alternative in the Bicycle/Pedestrian Corridor Study Area of Interest Analysis completed by the St. Lucie TPO in 2011.

Based on the evaluation of alternatives, adding on-street bike lanes, sidewalk on the north side and completing the missing link of off-road shared use path between Lennard Road and SE Green River Parkway is feasible for Segment B. Both on-street bike lanes and sidewalk on the north side are also feasible based on the existing 50 to 100 feet ROW width between SE Green River Parkway and Indian River Drive within Segment C. These improvements would provide safety benefits to both bicyclists and pedestrians as well as potential connections to future trails.

4.2 Recommendations

There are two alternatives for Segment B and three alternative for Segment C presented in this study for the Walton Road corridor from Lennard Road to Indian River Drive. A summary of these alternatives can be seen in **Table 4.2** below.

Table 4.2 Study Alternatives

Segment	Alternative
Segment A	Maintain existing multimodal features
Segment B	<ol style="list-style-type: none"> 1. Bike lanes, sidewalk, multiuse path 2. Curb and gutter – bike lanes, sidewalk, multiuse path
Segment C	<ol style="list-style-type: none"> 1. Roadway widening - add bike lanes & sidewalk 2. Roadway reconstruction with curb and gutter – add bike lanes & sidewalk 3. No roadway improvements – add raised boardwalk

Adding a minimum four-foot wide bike lane to each side of the roadway for the two-lane section within Segment B is recommended. The section with existing ROW widths of 50 feet (east of SE Belcrest Street) should have sidewalks for pedestrians in addition to on-street facilities for bicycles. Based on coordination with St. Lucie Public Schools, property owned by the school district adjacent to Walton Road could be donated for ROW to add off road paths or sidewalks. Further discussions with St. Lucie Public Schools are recommended.

Adding a six-foot wide sidewalk on the north side of Walton Road east of SE Scenic Park Street to Green River Parkway in Segment B and continuing east to Indian River Drive in Segment C is recommended to enhance pedestrian mobility by increasing access to existing parks and trails.

Continuing the meandering 12-foot wide off-road paved path between the existing edge of pavement and 20-foot wide utility easement adjacent to the south ROW line from west of SE Rainer Road to east of SE Arenson Lane and west of SE Grand Drive to Green River Parkway is recommended. Minimal clearing and grubbing and fill will be necessary along this segment. An elevated boardwalk

style structure, a minimum of 10 feet wide, with pedestrian railing is recommended in areas where there are potential wetland impacts.

The lower preliminary cost alternative for Segment B is alternative B1 (approximately \$1,850,000) which widens the roadway with four-foot bike lanes, sidewalk on the north side of Walton Road and a shared use path on the south. This alternative would require a swale and is much lower cost than alternative B2 (\$6,850,000) which includes roadway reconstruction with curb and gutter.

For Segment C, alternative C3 (\$1,150,000) is much lower preliminary cost since no roadway improvements are proposed.

An exhibit of these proposed recommendations as well as cost estimation can be found in **Appendix F**. ROW costs are not included. Wetland impacts are anticipated for entire alternate, therefore permitting will be required. Wetland impacts and mitigation costs are not included.

AGENDA ITEM SUMMARY

Board/Committee:	St. Lucie TPO Board
Meeting Date:	June 1, 2016
Item Number:	10b
Item Title:	Strategic Intermodal System (SIS) Multimodal Needs Plan Update
Item Origination:	Florida Department of Transportation District 4 (FDOT)
UPWP Reference:	Task 3.1: Long Range Transportation Planning and MAP-21 Implementation
Requested Action:	None. Discuss and provide comments to FDOT
Staff Recommendation:	As the update to the SIS Multimodal Needs Plan is underway, it is recommended that local projects potentially eligible for SIS funding be identified to FDOT for inclusion in the SIS Multimodal Needs Plan.

- SIS Criteria Summary

MEMORANDUM

TO: St. Lucie TPO Board

FROM: Peter Buchwald
Executive Director

DATE: May 24, 2016

SUBJECT: Strategic Intermodal System (SIS) Multimodal Needs Plan Update

BACKGROUND

The SIS is Florida's statewide network of high priority transportation facilities which include airports, highways, railroads, seaports, spaceports, and transit facilities. Additional information regarding the SIS and a map of SIS facilities are attached.

The SIS Multimodal Needs Plan identifies capacity projects needed for the SIS to meet Florida Transportation Plan Goals and SIS Policy Plan Objectives. The Florida Department of Transportation (FDOT) District 4 will provide a presentation on the process and schedule for updating the SIS Multimodal Needs Plan.

ANALYSIS

FDOT has initiated a process to update the SIS Multimodal Needs Plan from the current horizon year of 2040 to the year 2045. The process began in January 2016 and is scheduled to conclude in March 2017. Coordination with the St. Lucie TPO and other partners is a key component of the process.

Projects associated with SIS facilities are eligible for State funding which is dedicated to the SIS. To become part of the SIS, a facility must meet the criteria and thresholds identified in the attached Summary of Adopted SIS Facility Types, Criteria, and Thresholds.

To receive SIS funding, the project must first be identified as a need in the SIS Multimodal Needs Plan. The SIS Multimodal Needs Plan is the source for projects to receive SIS funding in the SIS Cost Feasible Plan, the 2nd Five-Year SIS Plan, and the 1st Five-Year SIS Plan which is incorporated into the FDOT Work Program for production.

RECOMMENDATION

As the update to the SIS Multimodal Needs Plan is underway, it is recommended that local projects potentially eligible for SIS funding be identified to FDOT for inclusion in the SIS Multimodal Needs Plan.

October 2015

DESIGNATED SIS AND EMERGING SIS FACILITIES					
Facility Type	Active and Planned Drop Facilities			Planned Add Facilities	State Funding Match: State share shown, remaining funds to be obtained from non-State sources
	Corridor Hub		Connector		
	SIS	Emerging SIS			
Commercial Service Airports	7	10			Up to 50% on hub
General Aviation Relievers	2				Up to 50% on hub

Upcoming 2015 SIS Policy Plan Update

Florida’s SIS Policy Plan is developed with extensive partner and public involvement every five years. Work is now underway to update the plan with completion expected in January 2016. Information is being posted on the FTP/SIS website during this update process and we invite you to participate and be involved as we evaluate the existing plan and develop a policy framework for Florida’s most strategic transportation facilities. To sign up for email subscriptions or for the latest documents and information please visit the website at:

<http://www.floridatransportationplan.com/>.

Florida’s Strategic Intermodal System (SIS) comprises Florida’s statewide network of high priority transportation facilities, including the state’s largest and most significant airports, spaceports, deepwater seaports, freight rail terminals, interregional rail and bus terminals, rail corridors, urban fixed guideway transit corridors, waterways, and highways. SIS facilities are the primary means for moving people and freight between Florida’s diverse regions, as well as between Florida and other states and nations. The SIS is Florida’s highest statewide priority for transportation capacity improvements.

There are three types of designated facilities:

- Transportation **hubs** (ports and terminals) moving people or goods;
- Interregional **corridors** (highways, rail lines, waterways and urban fixed guideway transit facilities) connecting major origin/destination markets; and
- Intermodal **connectors** (highways, rail lines, or waterways and other exclusive use facilities) linking hub-to-corridor; hub-to-hub; or strategic military installation-to-corridor.

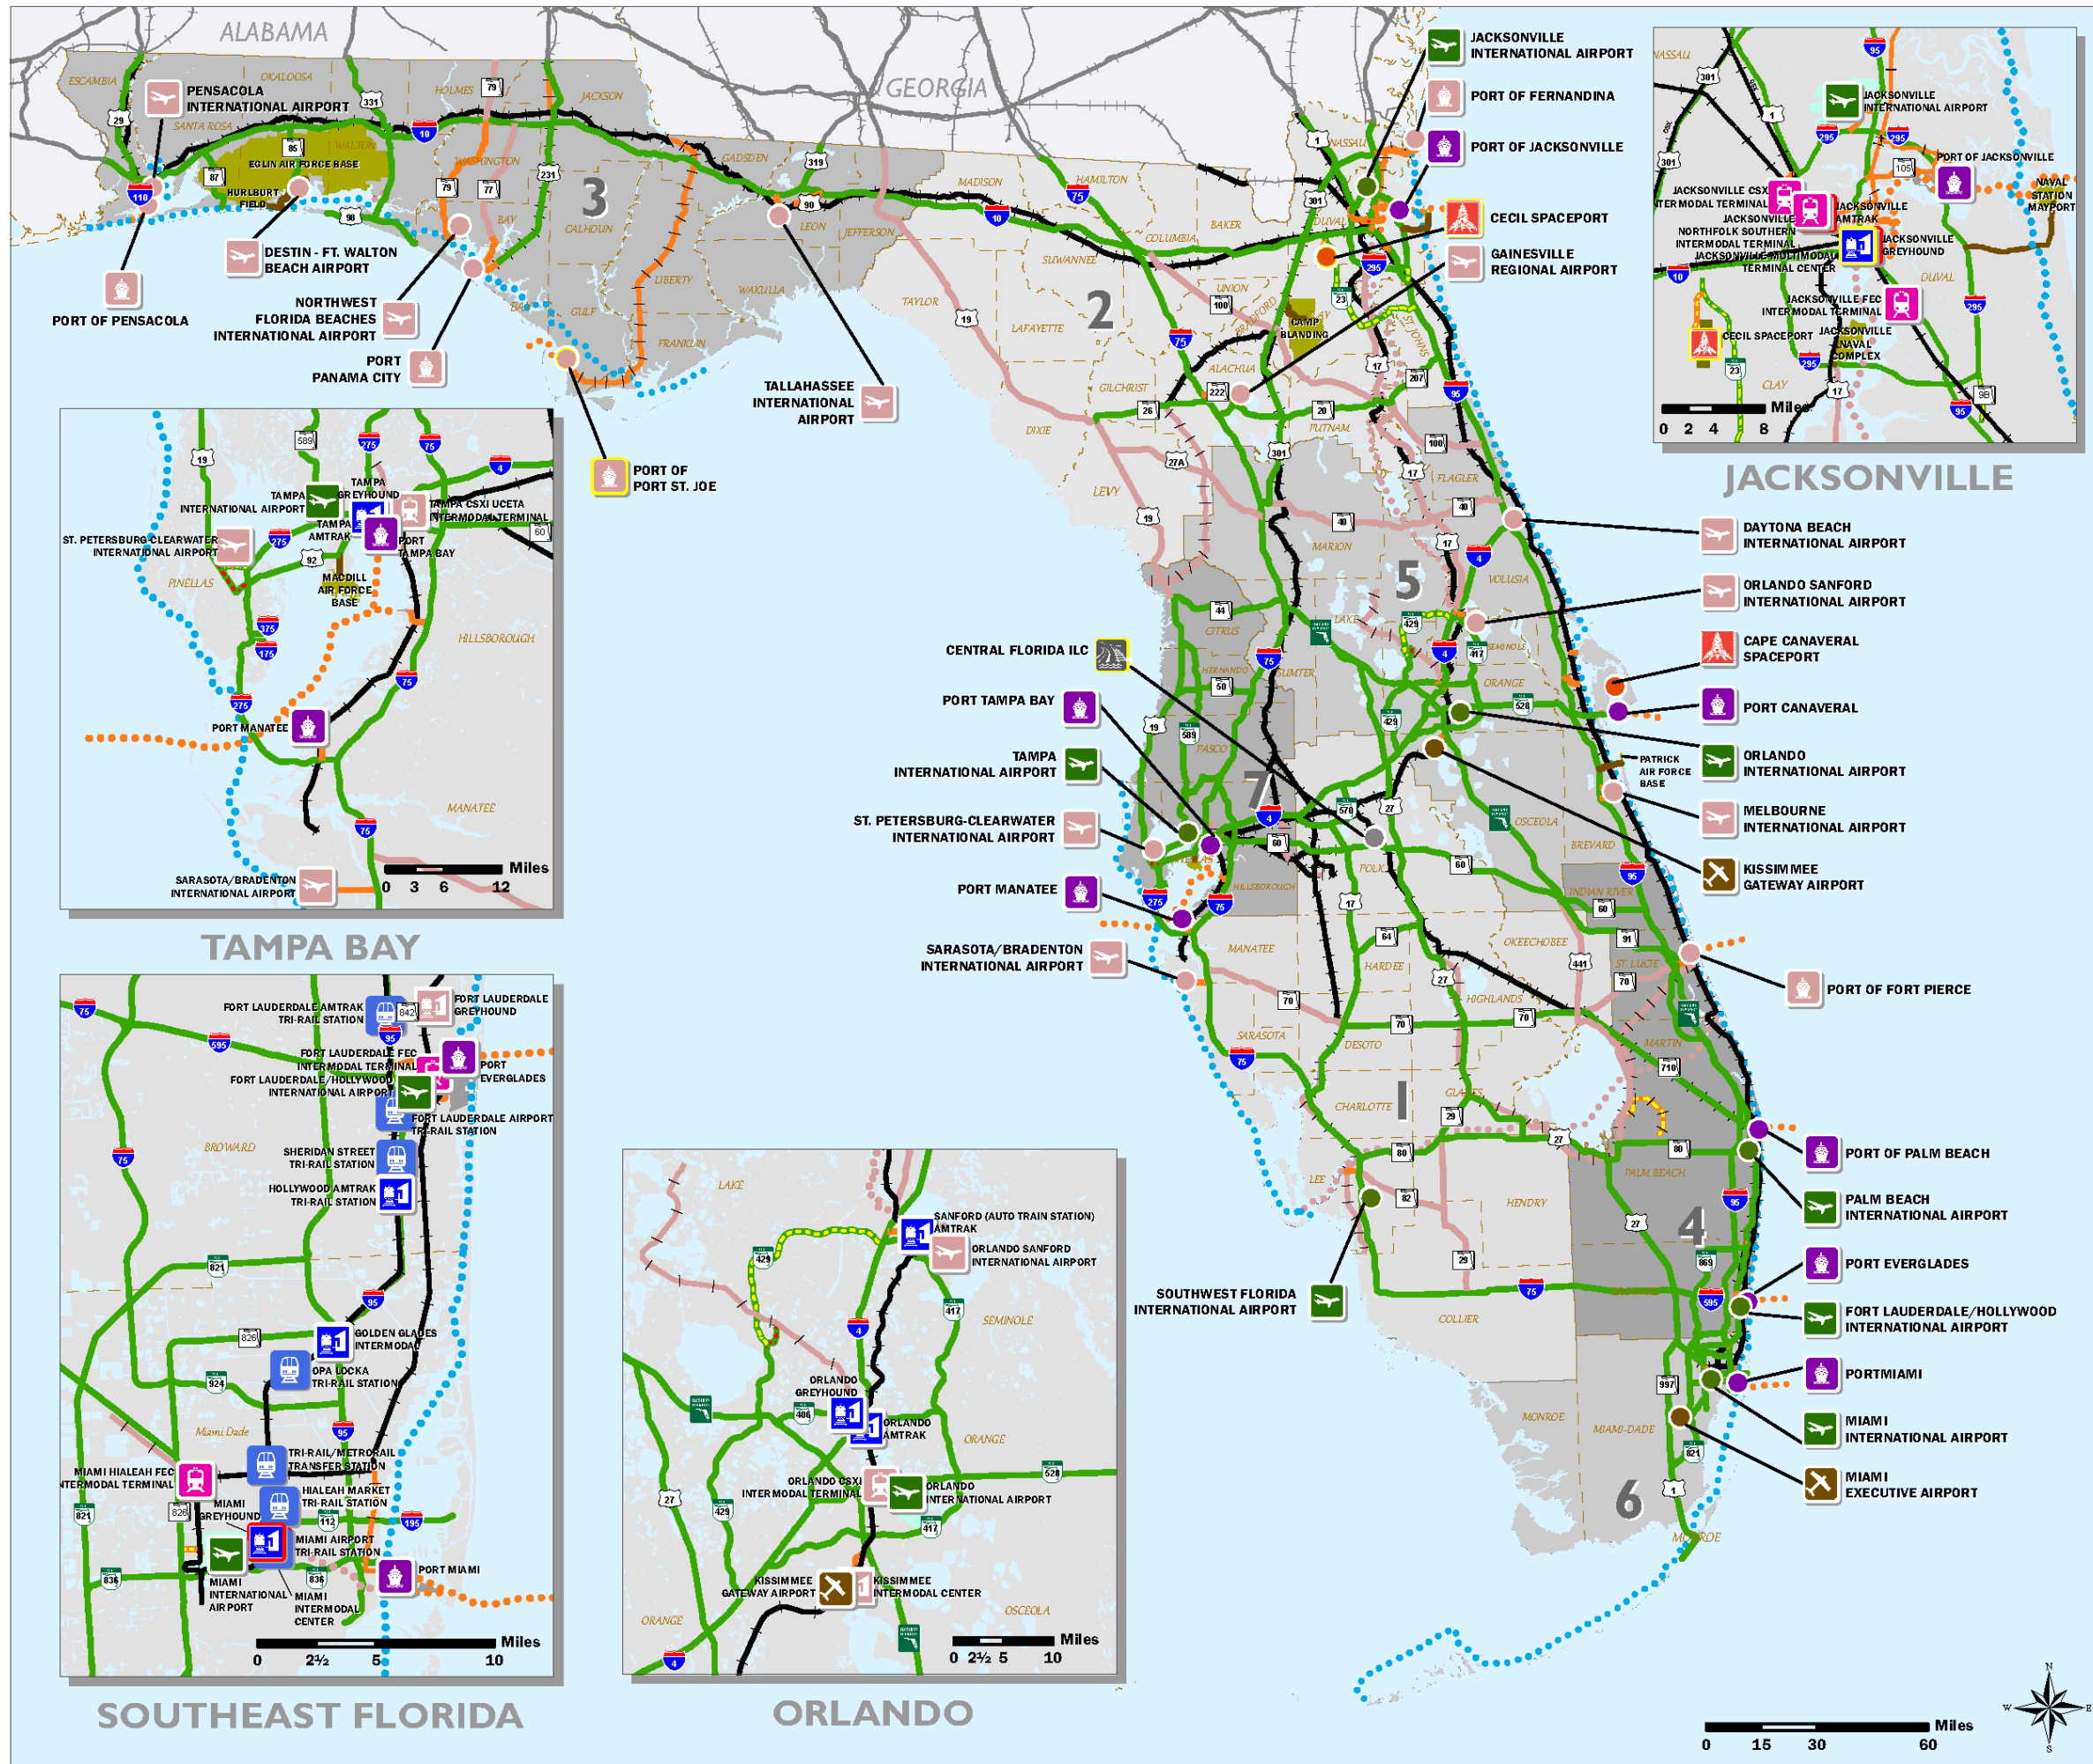

Two system components are collectively known as “The SIS”:

- **SIS** facilities meeting high levels of people and goods movement, generally supporting major flows of interregional, interstate, and international trips; and
- **Emerging SIS** facilities meeting lower levels of people and goods movement, generally serving fast growing economic regions and Rural Areas of Opportunity.

The SIS Strategic Plan in 2005 heralded a shift in the way FDOT and partners plan Florida’s transportation future. The current 2010 SIS Strategic Plan further defines the state’s primary role in transportation focusing on international, interstate, and interregional travel and transport of people and goods, with emphasis on the SIS. At the same time, stronger regional partnerships are encouraged to identify and invest in regionally significant transportation facilities, while local governments lead in addressing local movements of people and goods.

The 2010 SIS Strategic Plan and accompanying documents, maps and resources are available on the SIS website at www.dot.state.fl.us/planning/sis.

Summary of Adopted SIS Facility Types, Criteria, and Thresholds¹

Facility Type	Eligible Facilities	SIS Component	Emerging SIS Component
Commercial Service Airports	Airports with scheduled commercial and/or cargo services	0.25% of U.S. total passenger or freight activity	<i>Located at least 50 miles from a SIS commercial service airport² and</i> 0.05% of U.S. total passenger or freight activity or 0.01% of U.S. total passenger or freight activity and 0.05% of employment of industries dependent on aviation transportation ³
General Aviation Reliever Airports	General aviation airports functioning as relievers to commercial service airports	Identified as a reliever facility to an existing SIS commercial service airport <i>AND</i> Handles at least 75,000 itinerant (nonlocal) flight operations per year <i>AND</i> Has a runway with length exceeding 5,500 linear feet <i>AND</i> Has runway capable of handling 60,000 pound dual wheel aircraft and serviced by precision instrument approach <i>AND</i> 0.05% of employment of industries dependent on air transportation located within a 50 mile radius ³	Identified as a reliever facility to an existing Emerging SIS commercial service airport <i>AND</i> Handles at least 75,000 itinerant (nonlocal) flight operations per year <i>AND</i> Has a runway with length exceeding 5,500 linear feet <i>AND</i> Has runway capable of handling 60,000 pound dual wheel aircraft and serviced by precision instrument approach <i>AND</i> 0.05% of employment of industries dependent on air transportation located within a 50 mile radius ³
Spaceports	Spaceport territory as defined in s. 331.304, Florida Statutes or by Space Florida	Regularly scheduled civil, commercial or military launches resulting in suborbital or orbital flights	Not Applicable
Seaports	Deepwater ports as defined in s.311.09, Florida Statutes	500,000 home-port passengers or 0.25% of U.S. total freight activity	<i>Located at least 50 miles from a SIS seaport² and</i> 250,000 home-port passengers or 0.05% of U.S. total freight activity or 50,000 home-port passengers and 0.01% of U.S. total freight activity and <ul style="list-style-type: none"> • 0.05% of employment of industries dependent on waterborne transportation³
Interregional Passenger Terminals	Rail, bus, or multimodal terminals serving interregional or interstate passengers and providing on-site ticketing and support services	0.25% of U.S. total bus and/or rail interregional passengers per year (100,000 per year floor)	<i>Located at least 50 miles from a SIS passenger terminal² and</i> 0.125% of U.S. total bus and/or rail interregional passengers (50,000 per year floor) or 0.063% of U.S. total bus and/or rail interregional bus passengers and 0.05% employment in industries dependent on interregional passenger transportation located within a 50 mile radius ³
Freight Rail Terminals	Carload and intermodal terminals	0.25% of U.S. total annual rail freight activity	<i>Located at least 50 miles from a SIS freight rail terminal² and</i> 0.05% of U.S. total rail freight activity or 0.01% of U.S. total rail freight activity and <ul style="list-style-type: none"> • 0.05% employment of industries dependent on freight rail transportation³

¹See master list of adopted SIS Designation Criteria, Thresholds and Implementation Guidance for the full listing of official criteria and data details. For all types of facilities, community and environment screening criteria are applied prior to a final designation decision.

²Exceptions to the 50 mile minimum distance can be made for hubs serving a significantly different market segment from the nearest SIS hub.

³Minimum share of U.S. total employment may be reduced to 0.01% in designated Rural Areas of Critical Economic Concern.

⁴Rail corridors designated prior to adoption of new criteria in 2010 remain designated; additional rail owners must apply and demonstrate they meet these criteria.

Summary of Adopted SIS Facility Types, Criteria, and Thresholds¹

Facility Type	Eligible Facilities	SIS Component	Emerging SIS Component
Intermodal Logistics Centers	Intermodal Logistics Center as defined by s. 311.101 and s. 339.63, Florida Statutes	Supports trade moving to or from a SIS seaport or airport and identified in a local government comprehensive plan or development order <i>AND</i> Meets minimum size thresholds consistent with other SIS hub criteria for the type of intermodal movement primarily handled by the ILC	Supports trade moving to or from a SIS seaport or airport and identified in a local government comprehensive plan or development order <i>AND</i> Meets minimum size thresholds consistent with other SIS hub criteria for the type of intermodal movement primarily handled by the ILC or meets economic connectivity thresholds consistent with other Emerging SIS hub criteria
Passenger Rail Corridors	Rail corridors ⁴	Provides scheduled interregional or interstate passenger service	Not Applicable
Freight Rail Corridors	Rail corridors ⁴	At least 10 million gross ton miles of freight per mile	At least 5 million gross ton-miles of freight per mile <i>OR</i> 2.5 million gross ton miles of freight per mile and provides service to a county with 0.05% of U.S. total employment of industries dependent on freight rail transportation ³
Waterways	Navigable waterways	Intracoastal waterways and coastal shipping lanes <i>OR</i> Inland deep draft waterways with 0.25% of total U.S. annual waterway freight tonnage <i>OR</i> Inland shallow draft waterways with 0.25% of total U.S. domestic waterway freight tonnage	Interregional deep draft waterways with 0.05% of total U.S. waterway freight tonnage <i>OR</i> Inland shallow draft waterways with 0.05% of total U.S. annual domestic waterway freight tonnage <i>OR</i> 0.05% of U.S. total employment of industries dependent on waterborne transportation
Highways	State Highways	Designated Interstate facility <i>OR</i> Designated National Highway System facility providing connections to major markets in Alabama or Georgia <i>OR</i> Designated State Highway System limited access facility connecting two or more economic regions with each end at a SIS facility	Designated State Highway System facility connecting two or more economic regions with each end at a SIS facility <i>OR</i> Designated State Highway System facility serving a Rural Areas of Critical Economic Concern with each end at a SIS facility and meeting vehicle or truck volume criteria
Urban Fixed Guideway Transit Corridors	Urban fixed guideway transit corridors	Connects multiple urbanized area counties and serves as a regionally significant facility within single economic region (Note: criteria applied to individual corridors rather than the entire regional transit system)	Not Applicable
Urban Fixed Guideway Transit Hubs	Urban fixed guideway transit stations (Note: All qualifying stations are designated as part of the corridor)	Located at or near the termini of the urban fixed guideway corridor <i>OR</i> Serves a SIS airport, seaport, or spaceport; <i>OR</i> Are integrated with other passenger rail or bus systems providing connections to other regions or states	Not Applicable
Intermodal Connectors	State or local roads, rail lines, fixed guideway transit lines, and waterways	Three types of connectors can be designated: <ul style="list-style-type: none"> • Hub-to-corridor (connecting a hub to the nearest, most appropriate corridor) • Hub-to-hub (connecting a hub to another hub for freight or passenger movement) • Military access facility (connecting a strategic military installation to the nearest, most appropriate SIS corridor) 	Not Applicable

¹See master list of adopted SIS Designation Criteria, Thresholds and Implementation Guidance for the full listing of official criteria and data details. For all types of facilities, community and environment screening criteria are applied prior to a final designation decision.

²Exceptions to the 50 mile minimum distance can be made for hubs serving a significantly different market segment from the nearest SIS hub.

³Minimum share of U.S. total employment may be reduced to 0.01% in designated Rural Areas of Critical Economic Concern.

⁴Rail corridors designated prior to adoption of new criteria in 2010 remain designated; additional rail owners must apply and demonstrate they meet these criteria.
